# Cyber Security Solutions

## Digital Solutions

### *What is it?*

Cyber security is a complex problem that has become more sophisticated as technology advances. Cyber crime impacts everyone and many businesses are unaware of the risks or lack the resources and authority needed to fight it. We evaluate your business to establish your compliance, governance and risk profile. We then work with you to improve the security of your business using actionable, practical best practices informed by our years of experience running cyber security programs in both SME's and large organisations worldwide.

## Our Solutions

### *Cyber Security Compliance*

We help identify what is required for your business to be compliant with current security legislations.

### *Cyber Security Consulting*

Are you a business owner who is struggling to know what you need to keep your online security and data compliant?

### *Risk Management*

We will help you identify your organisational cyber security risks and work with you to mitigate these risks.

*Are you aware of your risks and the impact that cyber security incidents have on your organisation?*

*Do you need help understanding your risks and how to mitigate them?*

*Do you require certain certifications (ISO 27001) or have you been told you must comply with a particular framework to close a contract or apply for a tender?*
