Our Studio & Workshop

NACHSHON is a furniture design studio from Haifa, Israel, which includes a manufacturing workshop. Each piece of furniture is thoughtfully designed with an understanding of materials, techniques, and consideration of human needs.

NACHSHON is a local business with a small family-based team and has a deep-rooted belief in the value of craft and craftsmanship. The craftsmen play a significant part in the workshop and take deep care in every stage of the manufacturing process. The furniture are designed with New-Modern approach, balanced between classic-international design and a contemporary-local point of view. Aspiring to create furniture that are built to last, the manufacturing process combine traditional and new materials with different technique and technologies.
