

SMART MONITORING. AUTOMATED LOGGING. INTELLIGENT ALERTS.

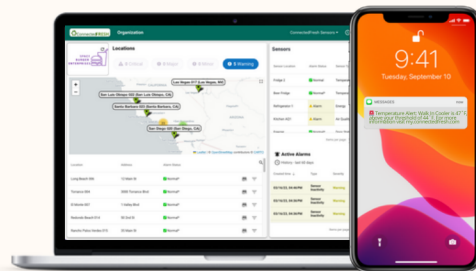

Pre-configured sensors for operators,
at a price that more than pays for itself.

Monitoring solutions for
temperature, energy,
doors, leaks, and more.

Low power IoT sensors
delivered pre-configured
and ready to go.

Immediately receive alerts
of issues before they
become problems.

973 hrs

Average time spent
on manual logs, per
location, annually

80%

Emergency
maintenance
cost reduction

30%

Reduction in
energy for door
open issues

LOWER

Incidents, risk,
insurance premiums,
and stress

BENEFITS

- Reduce operating costs
- Improve food safety
- Reduced risk of spoilage
- Improve equipment reliability
- High ROI
- Centralized data and reporting
- Integrate existing systems and partners
- Improved guest experiences

"We didn't know what we
didn't know; just how much of
a benefit they would be to our
time and energy until we had
them in place.
**ConnectedFresh's solutions
will remain a critical
component of our
restaurants."**

SOLUTIONS

Configurable Solutions

Solutions are configured using a variety of sensors to identify issues before they become problems, helping operators save time and resources:

- Temperature & Humidity
- Energy Consumption
- Door Open/Close
- Fill Level
- Air Quality
- Leak Detection
- Configurable Buttons
- More Sensors Available...

Temperature Logging

Automatically collect temperature logs from refrigerators and more, notifying teams if any issues arise.

Power Consumption

Is an asset drawing too much power? Asset health and usage monitoring, no electrician required.

Leak Detection

Water sensors can dramatically decrease the impact of plumbing-related problems by sending alerts the moment water is detected.

Kitchen Air Quality

Monitoring current CO2 levels and trends helps identify equipment issues and impacts to guest experiences.

In Transit Temperature

Track and maintain the quality of products during transit, reducing claims and improving safety.

Warehouse Temperature Worker Safety

Monitor safety concerns like temperature to ensure a safe work environment.

Bathroom Cleanliness

Is the bathroom clean for guests? Trigger cleaning based on demand and instant customer feedback.
