The first Swiss Program in the Field of FemTech

The FemTech Bridge to Asia, Africa, Europe, America and UK

Tech4Eva is on a mission to create an innovation platform in Switzerland, where disruptive start-ups and projects in FemTech from around the globe develop innovative solutions for improving or advancing technologies relating to women's health and achieving respective growth.

The Goal of this program ?

To create long-term impact for FemTech start-ups and create a global FemTech Community.

The global 9-month equity-free start-up acceleration program will help selected start-up companies to refine their business models and go-to-market process strategy to meet investors and potential customers and connect them with leading FemTech hubs around the globe.

Application 2023

A diverse community

We encourage women to launch their ideas

Only a small percentage of global start-ups are led by female founders.

Our application process counts more than 80% of start-ups founded or co-founded by women.

BC Platforms

Diversity in thought drives agility and business success.

Hanne Langmoen

Senior Business
Director International
Embecta

Companies that put the customer at the center of everything they do are the ones who will be successful in the future. Yet, the Health Care/Tech industry has under-invested in delivering solutions for 50% of the world's population – which is why I believe the market potential of FemTech is significant.

Sandrine Pioletat

Senior Director
Digital Patient Experience
UCB

I am very excited to participate to Tech4Eva as a mentor for start-ups in the field of women's health. At Terre des hommes, we innovate and develop digital solutions supporting health systems focusing on women through their pregnancy and their young children. I see a lot of synergies and look forward to a successful collaboration.

Françoise Lamotte

Director Digital
Innovation & ICT
Terre des hommes Foundation

Kai Thornagel

Director
Essity

We, the Essity Ventures team, are happy to join forces with Tech4Eva to support FemTech founders on their mission of breaking barriers to female health and well-being. Joining the Tech4Eva community allows us to share Essity's knowledge and insights that help founders with building and scaling their businesses.

Jeroen Van den Oeren

CFO
Sunbioscience

Honoured to support financial strategies for women health in this ambitious program.

From Corporates

I am delighted to join Tech4Eva as a mentor to guide their cohort of innovative founders within reproductive and maternal health.

Alissa Pereira

Product Strategy
Roche

Roche is committed to ensuring that every woman benefits from tailored & equitable healthcare across all stages of her life. One of the key drivers of change is to support and foster FemTech innovation to address the many gaps and opportunities that exist for Women's Health. We are thrilled to have the privilege of working with the team at Tech4Eva to help achieve this vision.

Working together with the Tech4Eva acceleration program as a cohort mentor was an easy choice for me. Not only is it one of the best places for founders to kickstart businesses in the FemTech space, but we know that when women win, everyone wins.

Emre Ozcan

Global Head of Digital
Health
Merck Healthcare

The why of the Tech4Eva is personal for me and ties together various journeys in my life. I come from a medical family that has made female health its business and passion, fertility technologies have helped my partner and me grow our family with joy, and I now work as a Digital Health leader in Merck Serono, the global market leader in female fertility technologies. It's a privilege to be part of this community to help create a more equitable, personalized, and value-based universe of health for everybody.

Samantha Paoletti

Head of Research
Business Development
CSEM

From Corporates

“In many countries, women do not have access to enough responsibilities in society, partly because of the lack of support for women-specific health topics such as period management, pregnancy, and menopause. This leads to an overall decrease in the health and well-being of women, hindering their ability to fulfill their societal roles. The Tech4Eva initiative addresses this issue by providing solutions to support women's health, empowering them to be more active and present in society.”

Anna Soederlind Zollinger

Head of Innovation

“

I am grateful to play a part in helping close the gender health gap through my work in women's health. Alongside improved research focus, funding, and improvements to standards of care, digitally-enabled solutions for women's health ("FemTech") will be critical to leading this change - which is why I am humbled and excited to serve as a mentor for Tech4Eva.

”

From Ecosystem

I am supporting FemTech because investing in women's health is an investment in development, hence an investment in the future of society.

Susan Herbert
Liefesciences Advisor

Sharon Brunt

Chief Brand Activist
& Founder
Be More Girl

Empowering women globally through better access to quality healthcare, is vital in achieving gender equality. Programs like Tech4Eva provide FemTech founders—from all walks of life—all-important access to expert mentorship, that might otherwise be out of reach. I've very much enjoyed being a part of it.

Marta Gehring

Business Development
& Marketing Strategist
Swiss Biotech Association

Nanci Govinder

Start-up Board Member,
Investor, Coach
Trainer and Juror

Skill-building and mentorship programmes are a critical (and fun) way to support FemTech start-ups.

The experience of mentoring FemTech start-ups through Tech4Eva and our own Femovate program has been deeply gratifying and humbling. The caliber of the founders I've met is exceptional, and their passion for their mission is contagious. I appreciate the opportunity to share our team's medtech design expertise with these start-ups and accelerate their time to launch a high-quality user experience.

Theresa Neil

Founder
Guidea

This is not about supporting technologies; It's about supporting my own health and the health of 50% of the planet. I'd be a twit not to support my own team.

EPFL Innovation Park

*I am a proud Tech4Eva mentor
and happy to support
entrepreneurs through increased
visibility and connections with our
dynamic BioAlps ecosystem.
Embedding the development of
FemTech within our Swiss Health
Valley is a step towards relevant
unbiased innovation within the
context of woman health and
beyond.*

Magali Bischof

Secretary General
Bioalps Association

*While developing medical devices adapted to
the needs of vulnerable and underserved
populations, I realized the striking
discrimination against women in healthcare,
even in developed countries. In addition, some
specific female health issues have been under-
addressed so far. Therefore, mentoring start-
ups developing innovative solutions for women's
health is a great source of motivation for me, in
particular, if those solutions could at the same
time also address other inequalities.*

SelfCerve is a self-administered medical device that allows women in low-resource settings to screen for cervical cancer. Our technology eliminates needing an exam bed, stirrups, and even a trained practitioner for a diagnosis. Our mission with SelfCerve is to reach the last mile by normalizing cervical cancer screening globally. With the distribution of the SelfCerve device, we enable low-cost, quality screening with the ultimate goal of increased treatment of precancerous lesions.

Founding partners

A pole of innovation as Tech4Eva's birth house

The EPFL Innovation Park supports disruptive innovations and the transfer of technologies of the prestigious Ecole polytechnique fédérale de Lausanne (EPFL) and other regional academic partners by providing flexible office space, training, acceleration, and coaching services. Building a true sense of community, the Park is devoted to housing start-ups, SMEs, research teams, and innovation cells from major companies that operate in fields as diverse as information technology, computing, health and nutrition, engineering, transport, telecommunications or materials.

In constant evolution since it was founded in 1991, EPFL Innovation Park currently houses 14 buildings with access to various laboratories and cutting-edge research, hosting over 150 start-ups, 26 large companies, and around 20 service providers. The vibrant campus provides a unique environment to a large network of dynamic entrepreneurs and established companies for exchanging ideas and knowledge.

Founding partners

Groupe Mutuel is Tech4Eva's main sponsor and is one of the leading personal and health insurance companies in Switzerland: more than 1.3 million private customers and close to 24'000 companies rely on the insurer every day.

In addition to compulsory health insurance (LAMal/KVG) and supplemental insurance (LCA/VVG), customers can choose from an extensive range of life insurance plans to cover risks and provide for their individual retirement benefits, as well as from a range of patrimony insurance solutions. Moreover, Groupe Mutuel insurers provide daily allowance insurance to companies pursuant to LAMal/KVG and LCA/VVG, as well as compulsory accident insurance (LAA/UVG).

Groupe Mutuel also manages Groupe Mutuel Prévoyance-GMP pension fund.

Tech4Eva program's partners

BioAlps, the Life Sciences cluster of Western Switzerland, offers a dynamic network, an innovative and supportive environment, and immediate access to the world of Life Sciences. It comprises an active and fertile ecosystem of research institutions, academic institutions, start-up companies, and large multinationals concentrated in a small, attractive geographic area with a great infrastructure.

CSEM is a Swiss private, non-profit, industrial research and development organization. They provide technological innovation solutions for many industries. Their mission is to develop and transfer world-class (micro) technologies to the industrial sector—Switzerland being their priority—to reinforce the sector's competitive advantage. They do this by making cooperation agreements with established companies and encouraging the creation of start-ups.

DayOne has built a platform for collaborative innovation across disciplines and industries by accelerating Start-ups, launching catalyst projects, and hosting a community and events to bring healthcare innovation ventures forward. They are shaping the future of health by accelerating digital transformation in Europe's leading healthcare and life sciences hub.

Essity is a leading global hygiene and health company that is breaking barriers to well-being. The company is listed on Nasdaq Stockholm. Sales are conducted in approximately 150 countries under the leading global brands TENA and Tork and other strong brands.

Tech4Eva program's partners

FemTech Analytics (FTA) is a strategic analytics agency focused on relatively young yet already treated as the next big market disruptor FemTech market, which embraces the cornerstone subsectors. The range of activities includes research and in-depth analysis on major areas of high potential in the FemTech industry, maintaining profiling of companies and governmental agencies based on their innovation potential and business activity, and providing consulting and analytical services to advance the FemTech sector.

Fermata accelerates the development of the FemTech ecosystem and a community that celebrates diversity in society. Create a place for women to share their concerns and issues related to their bodies Curate FemTech products from around the world and provide solutions in Asia.

FEMTECH france

FemTech France is the collective of FemTech entrepreneurs that aim To support the development of innovative projects in the field of women's health in France; Creating synergies between the different members of the ecosystem: project leaders, start-ups, and manufacturers, healthcare professionals, research laboratories, healthcare structures, etc.; and Taking part in the debates and strategic reflections on the political, technological and societal challenges of our sector. In 2022 FemTech France launched a boot camp dedicated to entrepreneurs who innovate in women's health and unveiled the first mapping referencing 80+ FemTech start-ups in France. They opened memberships in 2023, and 40+ French FemTech start-ups have already joined the collective.

Tech4Eva program's partners

The INSEAD Healthcare Club brings together students who wish to pursue a career in the healthcare industry, those who are seeking to return to the healthcare industry, and students who simply want to learn more about this fast-growing sector.

Joyance Partners is the first venture fund focused on finding and growing new companies that deliver Delightful Moments derived from science. Delightful Moments are part of all human experience: the small, but powerful, separations from the daily humdrum when we feel stronger, calmer, more joyful, more in control, more distant from pain and anxiety.

RH Capital is a wholly-owned, for-profit subsidiary of Rhia Ventures. RH Capital's venture funds invest in early and growth-stage companies that are driving innovation, access, and equity across the reproductive and maternal health landscape while delivering strong financial returns to investors. As impact investors, our unique mission of seeking both financial and social returns attracts inspiring and talented entrepreneurs who share a common vision—to improve the health of all women in the US. Underlying all of our work is a continued commitment to gender and racial equity.

Tech4Eva program's partners

Over our 125-year history, Roche has grown into one of the world's largest biotech companies, a leading provider of in-vitro diagnostics, and a global supplier of transformative, innovative solutions across major disease areas. As part of our commitment to providing the best possible care for every individual, we are on a mission to work with partners across the ecosystem to highlight and tackle some of the persistent challenges women face in healthcare.

SICTIC is a non-profit organization and the largest Business Angel Network in Switzerland, connecting the most innovative Swiss seed and early-stage tech Start-ups to smart money investors. SICTIC's mission is to shape the investor and Start-up ecosystem in Switzerland by growing the quantity and quality of Swiss early-stage Start-up investments. SICTIC is committed to helping Swiss tech Start-ups succeed, creating new jobs, and contributing to Switzerland's economic development.

The Swiss Biotech Association represents the interests of the Swiss biotech industry. To support its members in a competitive market, the Swiss Biotech Association works to secure favorable framework conditions and facilitate access to talents, novel technologies and financial resources. To strengthen and promote the Swiss biotech industry, the Swiss Biotech Association collaborates with numerous partners and life science clusters globally under the brand Swiss Biotech™.

Tech4Eva program's partners

Swissnex is Switzerland's Science and Technology global network connecting Switzerland and the world in education, research and innovation. Swissnex's mission is to support the outreach and active engagement of our partners in the international exchange of knowledge, ideas and talent. Swissnex is the launchpad for Swiss Start-ups going global.

The teams of the Swiss embassies in the Republic of Korea and in the United Kingdom are part of the Swiss global network connecting Switzerland and the world in education, research and innovation. They contribute to strengthen Switzerland's profile as a world-leading science and innovation hotspot.

Women of Wearables (WoW) is a leading global organisation aiming to inspire, connect, and support women and allies in emerging technologies such as wearable tech, IoT, health tech, and everything in between.
