

Threshold Ramps

Made from 100% Recycled Tires

Safety in Every Step

Threshold ramps are a safe and economical way to provide safe passage through doorways, sliding glass doors, and over raised landings and various indoor/outdoor drop offs.

Ramps increase mobility around the home. Those with smaller steps and mobility issues will have an easier time navigating bumpy thresholds and small alterations in height or level into different rooms in a home.

Naturally slip-resistant and easy to install. Our ramps are available in 3 sizes.

Small 1.5"

Perfect for use with wheelchairs, scooters and strollers. Slip-resistant and durable, easy to install, transport and are ADA compliant.

Medium 3.5"

Perfect for storage sheds, workshops and cabins. Makes an easy transition with steps and entrances. Slip-resistant and durable.

Large 5"

Built to withstand the weight and pressure of vehicles and heavy equipment. Commonly used for providing wheelchair access and eliminating tripping hazards at public events. Slip-resistant and durable.

Item Name	Dimensions	Weight	Part #	UPC Code	Qty/Skid
Threshold Ramp - (Wheelchair) - Small	35.5" x 12" x 1.5"	15 lbs	4219118	736846520388	100
