

Kanban System Design

Training for managers and team members who want to design a Kanban system (or improve an existing one) for optimal flow and faster delivery. The course includes learning the fundamentals of the Kanban Method, experiencing Kanban with a simulation game, and hands-on exercises to design a Kanban system.

Target audience

Kanban System Design course provides a broad overview of the Kanban method and the practices to implement it in a service-oriented manner for:

- Managers and team members who want to start a Kanban initiative
- Managers and team members who want to get more out of their current Kanban system
- Professionals looking to broaden and deepen their understanding of the Kanban method

Aims and Objectives

- ✓ Understand the Kanban method, its principles and practices
- ✓ Experience flow in a Kanban simulation
- ✓ Learn how to identify work item types and classes of service
- ✓ Learn how to apply STATIK (Systems Thinking Approach to Introducing Kanban) technique to design a Kanban system

Benefits

- ✓ Our courses are always delivered by experienced **practitioners** who **actively participate in Agile business transformations** on a daily basis.
- ✓ **Small training group** means each participant has a quality experience with maximum interaction with the trainer and other participants throughout the workshop.

- ✔ Participants receive a **Kanban System Design attendance certificate**.
- ✔ Participants can follow up with the Kanban Systems Improvement course which together with this course is the pre-requisite to the industry-recognised **Kanban Management Professional (KMP) credential**.
- ✔ Participants receive all necessary **course materials**.
- ✔ Participants receive a **book as a gift from Kanban University** to help them explore the course topics further.

Agenda

- Introduction
- Experiencing flow of work
- The Kanban Method
- STATIK
- Designing a Kanban system
- Summary

Always as scheduled. We respect your time. We never cancel our classes.

Why develop capabilities with Meirik?

Our courses are always delivered by experienced practitioners, not just trainers. They actively participate in business transformations with Agile on a daily basis and act as enablers to build extraordinary capabilities people need to succeed.
