**Grant Thornton Gibraltar** is a member firm within Grant Thornton International Ltd (*Grant Thornton International*). Grant Thornton International is one of the world's leading organisations of independently owned and managed accounting and consulting firms. These firms provide assurance, tax and specialist advisory services to privately held business and public interest entities. Clients of member and correspondent firms can access the knowledge and experience of more than 2400 partners in over 100 countries and consistently receive a distinctive, high quality and personalised service wherever they choose to do business.

“Telecommunication serves as an important tool for our businesses so it is vital to have these services. It is critical to our business that we have a quick, safe, secure and reliable means to communicate with our clients.

We have been with GIBFIBRE since they launched, initially using them as our backup ISP, but moved them to be our Primary ISP during Covid, when it was critical for our firm to be able to provide our services to our clients remotely. We needed a good and cost effective ISP and found that in GIBFIBRE. We've had a number of installations arranged in the past, always within the week it has been organised and installed in a day with no disruption to business.

By also using GIBFIBRE VOIP as our primary line for international calls, we can guarantee good quality connection, and a reduction to our overall cost when comparing with other competitors. ”
