RATO Superior Quality Engine

The **RATO R120-Vi motor** is **oversized compared to generators of the same power normally available on the market** .

This feature is essential to ensure high reliability of the generator, it reduces its effort and **increases its life by lowering the noise level**.

All **RATO motors** are built using the **best materials** , the **most innovative techniques** and the **most advanced methods for quality control** .

Each engine is carefully tested in order to test its perfect functioning before delivery.

In case of need, however, the RATO assistance service is always at your disposal.

Examples of use

The **GR2500iN** generator set is very versatile. **Ideal for campers, camping and free time, for stalls and markets etc.**
