

# for Healthcare Practices

# SUPERCARGE YOUR PRACTICE

Patients face many roadblocks to accessing care: transportation, cost, unnecessary exposure to pathogens, and quite simply – the inconvenience. A robust cloud platform for point-of-care and remote spirometry offers invaluable advantages for your practice.

- ✓ **Single Source of Truth**  
Achieve data consistency and eliminate disparate data with one device platform for in-clinic and remote spirometry, with all data accessible from a single source of truth.
- ✓ **Obtain Meaningful Data**  
With remote data capture, you can obtain more data points and more meaningful data to better understand disease progression day-to-day.
- ✓ **Deliver Proactive Care**  
Whether starting a new treatment plan or changing medication - measure effectiveness and adjust care plans without in-person follow-up.
- ✓ **Timely Intervention**  
Monitor high-risk patients for early detection of minor symptoms before they become major.
- ✓ **Generate New Revenue**  
Remote monitoring offers new reimbursement opportunities from video coaching to independent PFTs.

**55% prefer**  
telehealth to  
in-person<sup>1</sup>

**5.5M live > 1hr**  
from pulmonologist<sup>2</sup>

## ZEPHYRx Spirometry Cloud Platform

The ZEPHYRx Spirometry Cloud is an end-to-end platform for on-site and remote pulmonary function testing. Whether in-clinic or remote, **all of your spirometry data will be captured in the cloud and accessible in real-time** through a secure, web-based Provider Dashboard.

## Efficient and cost-effective point-of-care spirometry.

Streamline your in-clinic spirometry with a portable, multi-patient device and real-time data sharing.

### Kiosk App

- both provider and patient-facing interface
- HIPAA compliant with no data stored on app
- every effort assessed using ATS 2019 standards
- ability to accept or reject efforts

### MIR Spirobank® II Smart BLE Spirometer

- FDA-cleared for multi-patient use with disposable mouthpiece
- Bluetooth connectivity with no PHI stored on device for HIPAA compliance
- measures FVC, FEV1, FEV1/FVC%, SVC and more\*

 **HIPAA**  
COMPLIANT

Real-time data  
sent to Provider  
Dashboard

## Obtain spirometry data anytime, anywhere.

Reduce patient burden and obtain more data points with remote spirometry.

### Breathe Easy App

- intuitive interface with step-by-step instructions
- spirometry task reminder notifications
- live video call feature for coaching
- 8+ breathing exercise games

### MIR Spirobank® Smart Spirometer

- FDA-cleared for single-patient use
- Bluetooth connectivity with no PHI stored on device for HIPAA compliance
- measures FVC, FEV1, FEV1/FVC%, SVC and more\*

# ZEPHYRX® Provider Dashboard

## Access Kiosk and Home spirometry data through one interface.

The Provider Dashboard is a secure, web-based portal for clinical teams to access all spirometry data.

### The Provider Dashboard

- **ATS/ERS 2019 Standards of Spirometry** criteria used to assess each effort with details as to why an effort is acceptable, usable, or unacceptable
- **Real-time Video Coaching** enables clinical teams to coach patients virtually
- **Alerts for Changes in Lung Function** notify clinical teams when a patient's PFT series falls below a specified threshold
- **Task Reminders & Notifications** notify patients when to perform their PFTs to increase adherence
- **Data Visualization Tools** enable you to identify trends within your patient's historical PFT data and monitor lung function over any selected time frame
- **Results PDF** for EMR and reimbursement documentation

## REMOTE SPIROMETRY REIMBURSEMENT

Our team collaborates with industry experts to ensure we stay ahead of the curve, which means you do too. Because let's be honest – reimbursement is constantly evolving. Visit [zephyrx.com/contact](https://zephyrx.com/contact) to request our Remote Spirometry Reimbursement Guide.

## A plug-n-play solution for partner integration.

Simply plug a proven solution into your existing RPM platform or integrate data with your EMR.

## END-TO-END SERVICES & SUPPORT

We deliver the support you need to roll out a successful program.

- ✓ device logistics and shipping
- ✓ patient onboarding and support
- ✓ clinical team system training
- ✓ reimbursement consultation
- ✓ ongoing support for clinical team and patients

## WHO WE ARE

We're a group of IT ninjas, clinical trial champions, pulmonologists, entrepreneurs, former respiratory therapists, authors and patients. We've developed a cost-effective alternative to in-person pulmonary function testing allowing patients to be monitored remotely from the comfort and convenience of their homes. Our solution helps to transform our customer's practices and clinical trials.
