

Sterile Processing Department

Efficient Solutions

 **SKYTRON**[®]
Reliability • Versatility • Cost Savings

Processing Sinks

Skytron's Processing Sinks compliment your first and most important step in the disinfection process. They provide a means for the pre-cleaning, soak and scrub, inspection, and sorting of surgical instruments.

Alleviate Physical Stress

- Height adjustable settings ranging from 35"-42"
- Increased safety for staff

Clean Work Environment

- Laser etched gallon markings - quick and easy measurements
- 4" back-splash to contain material spillage

Configurable to Your Needs

- Single, double, or triple basins options
- Right to left | left to right workflow

Environment

Ultrasonic Washer-Disinfectors

The Skytron Flex was designed with versatility and throughput in mind. Process up to 125lbs of da Vinci, orthopedic, cannulated, and non-cannulated instruments at the same time, with non-proprietary trays - helping you do more in less time!

Reduce Labor and Error

- Eliminate staff risks from manual cleaning
- Independently lab tested and validated
- Irrigates with fresh, clean water and detergent
- Meets AAMI Standards
- Utilize your current baskets and vendor trays

Efficient and Cost Effective

- Triple the capacity of standard ultrasonic washer-disinfectors
- Multi-step cycle cleans and disinfects in less than 35 minutes
- With its thermal disinfection rinse, Flex can be used as a backup washer-disinfectors

Ease of Use

- Two thermal disinfection cycles - Cannulated and Non-Cannulated
- Reprocess mix loads in the same cycle
- Meets Intuitive Surgical Inc.'s recommended parameters for ultrasonic baths
- Built-in filtration system provides critical water final rinse

& Errors

Washer-Disinfectors

The Sterling P1000 and P1800 provide a full array of throughput options to outfit any Sterile Processing Department, offering the lowest possible environmental impact. Offering a large capacity, small footprint, fast cycles, low water, detergent, and electrical consumption our washer-disinfectors have more throughput while saving you space and money. Most importantly, the Steriling series disinfects devices completely on a consistent basis.

Water Conservation

- Up to 65% less water than other washers
- Save 50% in chemical and usage costs

Comply With Your Medical Device IFU's

- Configurable cycle parameters to meet your needs
- Remote connectivity with cycle data storage

Boost Your Efficiency

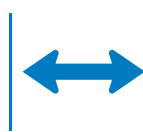

- Best throughput per cycle in a 40% smaller footprint
- Recyclable water, and chemicals for more sustainable consumption

Save Water

Compliant

Smaller
Footprint

Sterling C2000 Cart Washer-Disinfector

The Sterling C2000 streamlines and automates the decontamination process – bringing unsurpassed efficiency and flexibility to the Sterile Processing Department. The C2000 is engineered to be environmentally friendly by conserving water, energy, and chemical consumption using its built-in control functions and water recirculation system.

Lower Cost of Ownership

- Use up to 57% less water
- Fast cycle times for increased throughput
- Reduce electrical consumption with an optional steam heated drying system

Quieter Work Environment

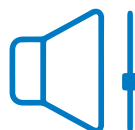

- Insulated glass helps suppress excessive noise
- Noise level is less than 63 dB (this equates to the level of a conversation or office environment)

Maximize Your Space

- Four different sizes available lowering the need for custom construction
- Process up to 37% more containers per cycle
- Up to 40 customizable programs available

Prep & Pack Tables

ErgoStat® Prep & Pack tables are designed to alleviate the physical stress placed on technicians performing the inspection, assembly, and packaging in your Sterile Processing Department. Put your staff member's well-being in mind and choose a Prep & Pack table that easily adjusts to the various physical attributes tasked on the human body – ultimately achieving better health, safety, and employee longevity.

Built to Last

- Increased stability with heavy duty inner/outer leg extrusions
- 750 lb dynamic and 1,000 lb static weight capacity
- Skytron exclusive non-porous solid Corian or Stainless Surface available

Configurable to Your Workspace

- 26 ½" to 41 ½" height adjustable workspace
- 43" vertical riser frame raises and lowers with the base
- Ergonomically correct alignment of computer monitors, lighting, bins, and pegboards
- Powered and manual (pin-adjustable) models available

Sterilizers

When it comes to sterilization technology, we understand that your needs are unique – in capacity, efficiency, usage savings, and more. The Integrity line of steam sterilizers builds on Skytron’s history of quality and innovation with industry-changing efficiency, throughput, ease of use, and limited space. Whether you’re outfitting a new facility, renovating an older one, or simply replacing outdated technology, Integrity brings superior technology and versatility that improves your sterile processing workflow. We offer three different sizes of Integrity Sterilizers so we can provide your Sterile Processing Department with exactly what you need.

Simple to Use

- Check cycle status with a large countdown timer and progress bar
- Electric power door offers hands-free control
- 12 preset standard cycles - 12 preset custom cycles

Work Efficiently in Small Spaces

- Integrity 215 has wider and taller chambers to accommodate larger trays horizontally
- Simple Plug-and-Play installation
- Save up to 63% in water consumption

Capacities to Meet Diverse Needs

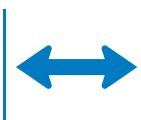

- Integrity 175 models are compact - a great choice for a small department footprint
- Integrity 215 doubles competitive validated capacity from three 25lbs trays to six - that’s 150lbs per cycle
- Integrity 270 processes up to 16 trays or 400lbs per cycle
