Text Message Opt-In

A Simple Tool to Boost Your Text Message List

Web visitors come and go, and you rarely capture their information.

With a 98% open rate and a 90 second average response time, there's no beating the engagement and immediacy of text messaging. We can now help you build your list of contacts.
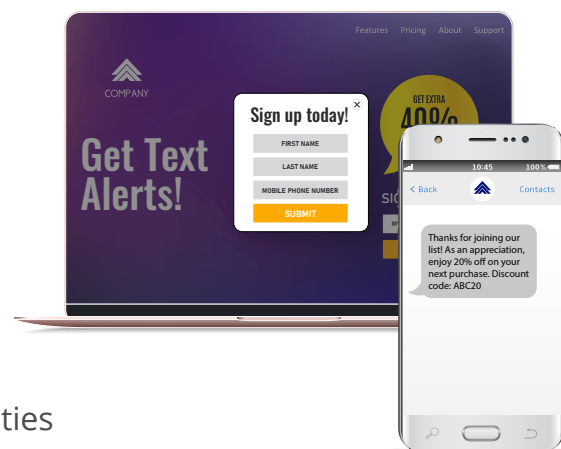

Our web plug-in allows people to enter their mobile number to join one of several lists where you can send them future text messages.

Engage by Cell's Text Message Opt-In allows you to capture and enroll people in a text message list. You can easily embed this form into your website where everyone can see it, or have it appear in a popup window from page load — that way they can't miss it. Start sending text message alerts with:

- Promotions, sales and discounts
- Order confirmations
- Donation suggestions
- Surveys
- Newsletters
- Volunteer opportunities

And hundreds more opportunities

Almost no one is reading your emails, right?
So start sending the content that everyone reads:

TEXT MESSAGES.

Call or email today for more information and pricing.
