

Anytime Anywhere Learning and Development on Mobile

Today's employees are hungry for knowledge and tech tools that will help them do their job better, smarter, and faster.

But interrupting the workday for classroom training sessions or watching hours of training videos is ineffective and frankly, unrealistic.

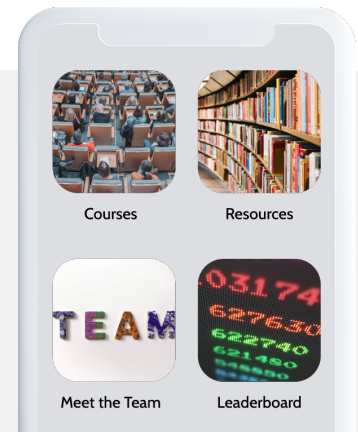

It's a no-brainer: the easiest way to train employees is on their phone.

With Engage by Cell's mobile web authoring platform, you can build a training site with the look and feel of an app, no downloads required.

With no limits on content, you can create custom materials accessible 24/7

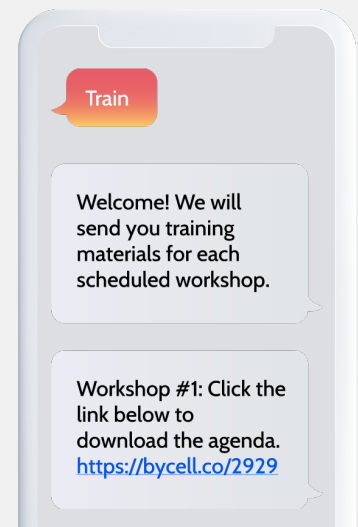

- Generate quizzes, polls, and leaderboards to increase learning retention
- Include images, videos, presentations, and PDFs
- Add a competitive element with leaderboards

PLUS, our platform includes a powerful text messaging tool to help you:

- Push motivating engagement actions via text
- Send micro-bursts of training
- Text out a fun GIF or photo
- Engage with any employee one-on-one via text chat
- Schedule content in learning drips

Take a Look! Text DEMO TRAIN to 56512 and play with a sample mobile training site
