

leprechaun trap decoration instructions

1. First, have the base of your leprechaun trap ready to go. There are so many fun and clever ways to create your trap, you can even find the building materials in your very own house! Toilet paper rolls, construction paper, straws, shoeboxes, pipe cleaners, and whatever creative materials you have make for a great trap to catch those tricky little leprechauns!
2. Second, we recommend cutting sections of the paper out into chunks so each decoration is separated from the other.
3. Third, cut out each decoration. You can either cut right up to the color, or cut along the dashed line for an easier experience.
- 4 Lastly, the most important step: DECORATE, DECORATE, DECORATE!!!!
You can attach each decoration how you see fit on your leprechaun trap using glue, tape, or whatever else you have on hand. Be creative, but more importantly have fun!
