About me

In the last five years, I have dedicated myself to developing my skills in the areas of Brand Identity, web design, and UI / UX. I officially completed my studies (Bachelor + master's) at the Academy of Fine Arts in Macerata. During the master I participated in two Erasmus mobilities (Spain and Poland) and, at the end of my studies, I did a training internship in Belgrade (Serbia). These experiences have been fundamental for my personal and professional development, giving me new perspectives and visions for my development as a Designer.
