

ivanti[®] Neurons

Hyper-Automation Platform to Self-Heal, Self-Secure, and Self-Service from Cloud to Edge

The demands on IT are growing exponentially as remote working becomes the next normal with employees working anywhere, anytime and expecting fast, personalized, consumer-like experiences. With the explosive growth of endpoints, edge devices, and the data they generate, cyber-security threats are reaching catastrophic new heights.

Ivanti Neurons is a hyper-automation platform that empowers enterprises to proactively, predictably and autonomously self-heal and self-secure devices, and self-service end users. Autonomously self-heal endpoints and edge devices; anticipate security threats and self-secure with adaptive cybersecurity; and deliver contextual, personalized user experiences.

Our customers:

- Reduced unplanned outages up to **63%**
- Resolved up to **80%** of endpoint issues before users reported them
- Discovered **30%** more assets, improving security posture
- Reduced time spent on harmonizing data from weeks down to minutes
- Decreased time to deploy security updates by **88%**

ivanti[®] Neurons

With Ivanti Neurons, enterprises augment their IT teams with automation bots to detect and resolve issues and security vulnerabilities proactively, predictably, and autonomously.

The Ivanti Neurons Platform includes:

◆ Ivanti Neurons for Edge Intelligence

Ivanti Neurons for Edge Intelligence gives IT the ability to query all edge devices using natural language processing (NLP) and get real-time intelligence across the enterprise in seconds. It provides quick operational awareness, real-time inventory, and security configurations across the edge leveraging sensor-based architecture.

◆ Ivanti Neurons for Healing

Ivanti Neurons for Healing offers an army of automation bots to proactively detect, diagnose, and auto-remediate configuration drift, performance, and security issues, and maintain compliance for endpoints. Automation of routine tasks paves the way to creating a truly self-healing environment, reducing time, costs, and improving the employee experience.

◆ Ivanti Neurons for Discovery

Ivanti Neurons for Discovery delivers accurate and actionable asset information in minutes. This provides visibility in real-time using active and passive scanning and third-party connectors. These provide normalized hardware and software inventory data, software usage information and actionable insights to efficiently feed configuration management and asset management databases.

◆ Ivanti Neurons Workspace

Ivanti Neurons Workspace provides a 360-degree view of devices, users, applications, and services, with real-time data. This allows first-line analysts to resolve issues previously escalated to specialists. User and device views cut complexity, long wait times and high escalation costs, resulting in faster end user resolution and greater productivity.
