- Able to easily identify where improvement is needed.
- Some directors are inclined to be overly critical of their contribution
- Suggest further improvements in graphical presentation of peer review. That said the Collective Board was well presented
Exec vs Non Exec very useful
- was impressed with the quick turnaround
- Survey results were presented in very understandable graphs and tables.
- In hindsight more work on the questions for the Collective board should have been done to take into account that the Bank operates as a subsidiary of the Financial Group. Also separation of exec vs non exec views would have been very useful, despite the impact on reducing the anonymity of the responses.
- It was clear and understandable and I appreciated the level of detail provided

How did you find the comments of the consultant in terms of being: [Copy](#)

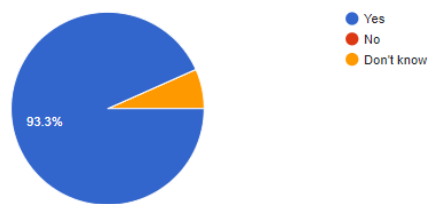

Provide comments if you wish, in particular whether any findings will likely result, or have resulted, in changes.

- After a very lengthy (3 hours) discussion of the Board Survey we are aware of the work to be done and the importance of the areas that are deficient.
- Reference to Other IA service provider very useful.
- I think the headline findings are a good trigger for action in considering adjusting the structure of meetings/agendas to extract the best value from the Board, as well as giving thought to the scope of work of Board committees.
- I hope and expect that the comments will result in changes.
- We will certainly use them as a point of discussion with the board

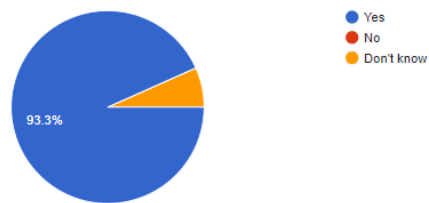

Do you think adequate value was received for the cost of the service? [Copy](#)
