content rules[™]
the global content experts[™]

Personalized Experiences

- Deliver
 - The right content
- To
 - The right person
- At
 - The right time
- On
 - The right device
- In
 - The language of their choice

content rules[™]
the global content experts[™]

Making Information Easy to Find is Not New

- Pliny the Elder (AD 23 – 79)
 - The Natural History in 37 Books
 - Book one is table of contents for other 36 books
- First English Index created in 1575
- Card Catalog created in 1700s
- TOC, LOF, LOT, Indexes – all ways to help people locate information quickly
- Importance of search in the internet era

21st Century Findability

- Natural outgrowth of quest to make it easy for people to find what they need
- Based on pushing the correct information
- Relies heavily on automation
- Will continue to get easier as Artificial Intelligence becomes more ubiquitous

content rules™
the global content experts™

**Most companies say
that personalizing the
customer experience
is a critical “must
have.”**

**Very few companies
believe they are
delivering enough
personalized content
or delivering it well.**

Why Do So Many Companies Fail?

content rules™
the global content experts™

Common Personalization Mistakes

- Starting at the end, rather than the beginning
 - Focusing on delivery rather than creation and management
- Throwing new tools at old content
 - If you throw expensive new tools at the same crappy content, you end up with expensive crappy content
- Same old silos, new paradigm

The Personalization Paradox

content rules™
the global content experts™

To Personalize, You Must Standardize.

content rules™
the global content experts™

To Personalize, You Must Standardize.

STANDARDIZATION

content rules[™]
the global content experts[™]

Personalization Done Just Right

- The balance between standardization and personalization becomes even more important when building at scale
- An apartment building with identical units will be the cheapest to build
 - Will it satisfy the needs of each tenant?
- A neighborhood of completely custom-built units will suit everyone's needs
 - It will take a lot of time and money to construct

content rules™
the global content experts™

content rules™
the global content experts™

The Goal

- Personalized experiences that meet customer needs
- Efficiently created using standards
- At scale

And herein lies the paradox. In order to create nimble, reusable pieces of content that can be combined, on the fly, in different ways for different people and different devices, ***you must standardize everything about the content.***

content rules™
the global content experts™

The Five Dimensions of Standardization

content rules™
the global content experts™

The 5 Dimensions of Standardization

Output Types

Words

The **quick**
brown fox
jumps over
the lazy dog.

Sentences

Paragraphs

Components

content rules[™]
the global content experts[™]

Output Types

The output type determines what content to **deliver**, in what order, to produce a final deliverable.

Output type is like the **floor plan for** your home. It is the invisible structure that creates consistency and usability.

Words

Standardize your terminology so every piece of content you create uses the same term to mean the same thing.

Terminology is like **your fixtures** -- it's the smallest detail that makes the house a home.

Sentences

The **quick**
brown fox
jumps over
the lazy dog.

content rules
the global content experts™

The standards that govern **plumbing and electrical systems** define how various fixtures are combined.

Grammar and style rules govern how words are combined. For the system to work, everyone needs to follow the rules.

Paragraphs

The paragraph is where you define the tone and voice of your company.

A consistent aesthetic builds your brand and gives your home a distinct personality.

Components

The component is an independent unit of content that can be combined with other components to deliver an experience.

A component is a **room in your house**.

Once you standardize everything about the content, you can create nimble, reusable pieces of content that can be combined, on the fly, in different ways for different people and different devices.

You can deliver *personalized experiences at scale*.

The Future of Personalization

content rules™
the global content experts™

Artificial Intelligence Will Change Personalization

- Use complex algorithms in the form of artificial neural networks (ANNs) to determine what content you need
- Use machine learning to understand more about you
- Aggregate content from many sources
- Deliver content in any format
- Create content using natural language generation (NLG)

3 Important Things You Can Do to Prepare for AI

Structure Your
Content

Curate Your
Content

Create Question/
Answer Pairs

content rules[™]
the global content experts[™]

Structure Your Content

Easier for people
and machines to
analyze

Organizes content
in a machine-
friendly way

Provides a way to
micro-focus on
important content

content rules[™]
the global content experts[™]

Curate Your Content

- Your AI solution will produce better results if you curate your content now

Fix

Inconsistent
Inaccurate

Discard

Out of date
Not important
Not accurate
Not fixable

content rules[™]
the global content experts[™]

Create Question/Answer Pairs

- Used to begin the machine learning process
- Simple one sentence questions and one sentences answers work best
- Can be used for chatbots immediately and machine learning later

Summary

content rules™
the global content experts™

To Create Personalized Experience at Scale

- Chunk content into reusable components
- Standardize everything
 - Words
 - Sentences
 - Paragraphs
 - Components
 - Output types
- Prepare for AI in the future
