Landlords love us

Jeff R

Small business

"Great experience with Tenantcube!"

Overall, I am extremely happy with how everything was handled. Darren was superb in keeping me updated and setting proper expectations. I liked how he explained everything and provided information on the tenants based on his background checks. The software worked as it was supposed to, very user-friendly and intuitive. Andrews and his team built a great platform to help landlords better manage their properties - with ease. Highly recommend Tenantcube for those who own or manage rental properties.

Rick

Property Manager

"Awesome, getting it all set up takes minutes and will now save me hours"

Its very robust and integrating with other apps is awesome. Banking and pmt tracking, maintenance and scheduling, and expense tracking my favs

Tyler Stewart

I started using Tenantcube about 6 months ago and would highly recommend to a landlord of any size! The pricing structure caters very well to how many units you operate so it is feasible for the small/mid size landlords alike the large ones too!

Their platform is very simple and easy to use, and it also includes a number of features that simplify the process such as internal credit checks, applications, renters insurance links, etc.

The automated payment feature is another very desirable aspect of this platform, it takes the guess work out of who has or has not paid and ensures everything ends up in your bank and is tracked as well.

Finally, the most important part is the support that Tenant Cube offers. Their support chat on the website is always staffed and ready to help, and they mitigate problems within 1-3 hours no matter the time or day.

Would strongly recommend to any landlord to make your life easier!
