THE HEART OF EVERY GREAT MACHINE

Essential for any Perkins engine overhaul

These convenient kits are essential for any Perkins engine overhaul. They contain precision matched parts specific to the engine's build, including pistons, rings, hardware, gaskets and seals. Buying this kit of genuine parts offers significant cost savings over buying individual parts.

The importance of genuine parts

Fitting incorrect or mismatched components could cause serious engine damage, premature wear or failure to meet emission standards. Using genuine parts gives you the confidence that they will be a perfect fit to your Perkins engine to ensure it performs at its best.

All components are precision-made to guarantee the highest standards of quality and durability.

Why you need a kit

Many engine parts are designed for single use and must be replaced during an overhaul. That's why we provide all gaskets, O-rings and seals you need in a single kit, so you can be sure you have everything available when performing this important job.

Cost savings

Our overhaul kits provide significant cost savings compared to buying individual components, as well as saving you time by not having to identify the full set of parts that are needed.

The benefits of a kit

- Everything you need in one kit
- 100% genuine parts
- Quick and easy to order using a single part number
- Save time and money
- Comprehensive range of kits available
- High quality gaskets made using the latest technology

12 month warranty

All of our genuine parts are factory tested to exceptionally high standards and come with a 12 month warranty from date of purchase.

Your local Perkins distributor

Contact us today for access to a complete range of genuine parts and expert advice from Perkins-trained specialists.

With a single order, our overhaul kits provide a convenient way to restore the optimum performance of any Perkins engine for its long and healthy life.
