Great Results with Airmation

We were a bit hesitant to have the Airmation Industrial Air Cleaner installed in our restaurant, as we were evidently one of the first restaurants to purchase this unit.

With 3 industrial sized smokers in our kitchen, running 24/7 for more than 20 years, we thought the air cleaner from Air Technology Solutions would be perfect for our situation.

We have been very pleased thus far with the results. The benefits of cleaner air in the kitchen are many. While everyone would agree better air quality is a good thing, we also look forward to the cost savings to be derived from a generally cleaner kitchen environment. Very happy so far!
