

A healthier start for babies & the planet

Here are some of the ways we are playing our part:

Company

Community

Our vision is a safe and sustainable world where women feel supported and confident as they become new mothers.

We pledge to become **climate neutral by 2030**.

Find out more: <https://lansinoh.com/pages/sustainability-community>.

Lansinoh.

We are **reviewing** all of our business activities and products to see where greenhouse gas (GHG) emissions can be **avoided** or **reduced**.

We have set **emission reduction targets** approved by the Science Based Targets Initiative (SBTi).

We have started to launch **climate neutral products** in 2021.

We are **supporting** our local communities around the world.

Removed 500kg of rubbish from the Aegean Sea & employees have taken part in a **breastfeeding training program**.

Support the University of Leeds in their research “the co-benefits of a low carbon economy: improved air quality & reduced global warming”.

Supported **tree planting** activities & **delivered Zero Waste Workshops**.

Donated over 100,000 breastfeeding products to 2 local milk banks and hospitals.

We **offset** unavoidable emissions by **supporting a 3rd party certified project** in Cambodia, which reduces GHG emissions by providing clean water access for rural families.

What is **climate neutral**?

Climate Neutral involves taking responsibility for the impact of our activities on the climate. First, focusing on how to avoid & reduce GHG emissions, then offsetting any remaining emissions. Ultimately having no net effect on the climate.

Having no effect on the climate is proven to be one way we can limit global warming.

What is **offsetting**?

Offsetting is investing into certified climate protection projects that should equal the impact of remaining emissions (eg. planting trees).
