

Better Together

Bullitt and Skylo's engineering teams have worked closely together to develop the world's first 3GPP standards-based approach to satellite NTN or 'direct-to-device' connectivity. Skylo has developed a revolutionary way for the Bullitt smartphone to access existing geostationary satellites, providing affordable and continuous coverage internationally over existing, well-established satellites with which Skylo partners and integrates. This combination provides the most robust, scalable solution yet for direct-to-device connectivity while being incredibly efficient on the phone's power consumption.

@skylotech

Skylo is a global non-terrestrial network (NTN) service provider, leveraging the standardized 3GPP ecosystem to offer seamless hybrid connectivity using existing, established satellites. Our network complements terrestrial cellular networks and functions as a roaming partner for terrestrial network operators, allowing subscribers an enhanced coverage and accessibility experience. Importantly, access to Skylo's network requires no change in the user hardware nor any additional/special antenna, as long as the device uses a compatible cellular modem capable of R-17 NB-NTN, certified by Skylo.

Skylo partners with existing satellite operators to orchestrate and unify multiple different satellites and spectrum with its technology. Skylo's RAN is installed into the existing satellite Earth stations that allow for immediate service, without the need to launch new satellites, and is compatible with upcoming LEO constellations.

Skylo's network integrates seamlessly with terrestrial cellular operators with standard core-to-core interfaces.

With over a decade of 'tough tech' experience, Bullitt Group is the world's leading manufacturer of rugged phones. Its award-winning and innovative products have consistently led the market with resistant functionality and tailored feature-sets specifically designed and built for extreme working conditions and the hard-knocks of everyday life.

With Cat phones, Bullitt harnessed rare manufacturing experience to the world's premier rugged technology brand to create unprecedented success in a highly competitive and poorly differentiated market. With a strong and consistent consumer base all over the world (construction, emergency services, outdoor professionals) and a clearly defined set of professional needs (tools, extreme performance, work enhancers) we continue to develop products that are both useful and respected.
