

Better Together

FocusPoint and Skylo have a partnership to combine Skylo's satellite connectivity with FocusPoint's flagship solution "Overwatch & Rescue" (0&R).

Under this partnership, FocusPoint will be a preferred supplier for Skylo and its customers, with an emphasis on offering 0&R to all device manufacturers that engage Skylo to enable satellite connectivity and need emergency responses. 0&R is a service guarantee that reduces and, in many cases, eliminates the financial exposure associated with an emergency response. 0&R comes standard with benefits like 24/7 multilingual crisis consultation, search and rescue, no-cost security and medical evacuations, emergency response for hazardous summer and winter sports incidents, natural disasters, pandemic threats, and more. 0&R is an ideal solution for anyone that lives, works, or plays on the fringe of cellular connectivity – and users will now be able to connect to Skylo's satellite technology when out of reach of cell service.

Skylo Technologies is an NTN service provider based in Palo Alto, CA, offering a service that allows cellular modems and devices to connect directly over existing satellites. Devices connected over satellite are managed and served by Skylo's commercial NTN vRAN, featuring a 3GPP standards-based cloud-native base station and core. Skylo works with existing satellite operators, terrestrial mobile network operators, and device makers to provide subscribers an anywhere, anytime connectivity solution that seamlessly roams between terrestrial and satellite networks. Skylo's focus is on enabling connected services for people outdoors and connected workflows for machines at work across critical industries such as agriculture, maritime, logistics, mining, and others, in addition to mass-market consumer devices.

FocusPoint International is a critical event management company that specializes in Emergency Response as a Service (ERaaS).

FocusPoint is in the business of identifying and illuminating possible threats, mitigating risks, and responding to crises events impacting people and organizations on the move. Leveraging intelligence-driven, proprietary technology solutions, the company specializes in the full provision of location-based device monitoring and escalation services, medical and security evacuation services, and crisis response services in support of specialty risk insurance products.

As a global company with 16 offices on 5 continents and over 5,000 proprietary and vetted personnel, FocusPoint is well positioned to deliver an integrated suite of products and services that address the growing concern of blended threats, financial loss, mobility and reputational risks of multinational organizations, government agencies, high net-worth individuals and families, non-governmental organizations, and business, student, adventure and leisure travelers.
