

### Solution

- Facility plans
- Alarm data
- Assets
- Maintenance
- Guards
- Standards
- Incidents
- Shrinkage
- Audits and risk

Generate optimized designs of new facilities, automate your budget planning, and provide insights to proactively manage your asset lifecycle.

Drive efficiency of maintenance, vendor performance, and guarding across all of your portfolio with data-driven trends and insights.

Ensure enterprise wide standardization and compliance, and gain visibility and control to mitigate and reduce your risk.

### Value

\*Sources available on request

- Siloed data and manual processes lead to cost overruns and business risks. AI technology unifies data, automates processes and generates insights to reduce costs and optimize operations.
- Optimize designs and eliminate the errors which waste 10%-25% of a typical project's budget with AI-powered design automation.
- With automated security compliance, reduce the risk of data breaches, 9% of which stem from a compromise in physical security and cost on average \$3.96M per incident.
- Leverage data to eliminate costly maintenance inefficiencies and identify areas for improvement for overall savings of more than 15%.
- Reduce incidents and shrinkage by up to 2% by identifying trends and correlations, and re-focusing your security assets
- Save up to 3% of guarding costs with AI-based optimization of working hours, locations and patrols.

### Indicative ROI

	#	Avg. Cost	Total Annual Cost	Projected savings
Buildings	100	—	—	—
Guards	500	\$60,000	\$30,000,000	\$450,000
Shrinkage	100	\$10,000	\$1,000,000	\$20,000
Maintenance per building	100	\$1,000	\$100,000	\$10,000
Moves and changes	200	\$3,000	\$600,000	\$120,000
Audits and site surveys	20	\$8,000	\$160,000	\$80,000
Capital projects	3	\$100,000	\$300,000	\$60,000
BeamUP annual subscription	100	\$2,000	\$200,000	—
			\$32,160,000	\$740,000

Net Annual Savings > \$540,000

ROI > 270%
