2. DIRECTORS' REPORT

Economic Review:

Pakistan's economic growth in FY18 seems likely to exceed last year's growth of 5.3%, if not meet the 6% target. This is on back of thriving retail and commercial business activity fueled by higher income levels at the consumer level. Whereas, capacity expansions are already in progress in various industries like cement, steel, and automobiles. In fact, all major sectors of the economy i.e. agriculture, industry and services are likely to contribute to the balanced growth outlook for FY18. In this context, though there are apparently no serious risks to growth per se; the growing external imbalances remain the key challenge courtesy of robust domestic demand which is evident from high imports growth.

SBP has also cautioned about potential overheating of the economy, risk of inflation exceeding its target and global central banks heading for potential rate hikes. Our domestic monetary policy is then likely to focus on dealing with macroeconomic stability if not merely targeting inflation. In that, monetary tightening has already begun as SBP raised the policy rate by 0.25% earlier during 3Q-FY18. This should help contain any sharp rupee devaluation as well as keep the domestic demand in check.

Pakistan is facing both external account pressures and a strong economic growth at the same time as supply-side constraints usually come to the fore when economic activity picks up pace. Higher import growth is just an offshoot of this pattern. Therefore, an in-depth economic policy making geared towards boosting exports, curbing unnecessary imports while also addressing the country's structural problems should be the panacea to the country's prevailing economic woes even if it comes at a cost of further debt buildup as long as consistently robust economic growth is not compromised.

Capital Market Review:

KSE-100 index gained 11.9% during 3Q-FY18 whereas the index remained 2.2% down in nine months of the outgoing fiscal year since June 30, 2017. Banking, Cement & Fertilizer sectors contributed most to the upside in the index while cements stood as the major outperformer during the quarter. Whereas, textile and auto sectors were the major laggards during the same period. On a YoY basis, average volumes and value traded fell by 39% and 48% respectively during 3Q-FY18 whereas, the same were down 52% and 46% respectively during the nine months of FY18. Going forward, the upcoming budget expectations in terms of tax reliefs and potential new incentives for the various industries would likely drive market sentiments. Furthermore, a smooth transition over to the new government along with clarity regarding interim care-taker setup should help build investor confidence.

Performance Overview:

The following table depicts the Company's performance in the current period:

	2018	2017
	RUPEES	
Accumulated Gain / (Loss) as at July 01	20,051,403	(37,909,634)
Profit / (Loss) after tax for the period	(53,683,155)	55,689,968
Accumulated Gain / (Loss) as at March 31	(33,631,752)	17,780,334
Earnings Per Share Rupees	(1.19)	1.60

Although, the equity prices gained fairly well during 3Q-FY18, overall trading activity remained subdued in the nine months of the outgoing fiscal year when compared with the same period last year. Despite challenging times amid political uncertainty, our revenues dropped just marginally by 5% YoY during 9m-FY18. Conversion of tax deduction on brokerage to Final Tax Regime caused an effect of Rs.15.7 million on profit. Although, brokerage revenue fell by 22% YoY, advisory/ consultancy income showed marked improvement as it increased astoundingly by 114% YoY on back of strong deal flow in investment banking. This has been achieved despite that few planned IPOs had to be delayed due to weak market sentiments earlier during 1H-FY18.

The company continues to look forward to enhance shareholder value by providing superior quality of financial services in research, equity trading and corporate finance/ advisory.

For and on behalf of the Board of Directors

April 23, 2018

Mrs. Hanna Khan
Chairperson

The Company filed appeal before the Commissioner Appeals (SRB) against the said order. The Commissioner Appeals (SRB) passed the final order dated 21 November 2014 for recovery of assessed amount Rs. 871,581 and default surcharge to be calculated at the time of payment.

The Company filed the petition against the order to the Honourable High Court of Sindh ("The Court") and the Court granted an interim order dated 28 November 2014 and restrained the SRB from demanding any payment till further orders by the Court. 28 FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

Fair value is an amount for which an asset could be exchanged or a liability settled between knowledgeable willing parties in arm's length transaction. The table below analyses financial instruments carried at fair value, by valuation method. The different levels (methods) have been defined as follows:

Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Fair value measurements using inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

Fair value of the financial assets that are traded in active markets are based on quoted market prices. The following table shows fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy.
