

Stairs and Stair Towers

Solid, Safe, and Durable

Our industry-leading structural steel stringers with bolt-in diamond plate treads provide a solid, safe and durable staircase built to an exact fit. Our code-compliant staircases feature a rise-to-run ratio that is consistent, comfortable and safe.

Construction

- Stringers constructed of 10" structural steel channel
- 1-1/2" square guardrail with 1-1/4" round inside handrail
- Diamond plate treads and landings
- Available with closed or open risers
- Self supported or rack/modular supported
- Stringers and railings painted one solid color. Optional two tone paint is available for a slight premium.
- Designed to meet local governing codes.
