

# Ü SHADOW TECHNICAL

**DEADLINE: Monday, February 15th @ 11:59 PM**

*THIS ASSIGNMENT IS ONLY PART OF THE APPLICATION; BE SURE TO INCLUDE THESE ASSIGNMENTS AS AN ATTACHMENT ON YOUR FORM*

## BRIEF

Approaching our first anniversary, Umlaut Foundation has established itself among the Californian foster youth community as a resource for mentorship and materials. In a commitment to our youth, we are looking for students that can help Umlaut Foundation redefine its full potential. To maximize our growth, we are looking for candidates who will surpass Umlaut's expectations and expand its capabilities.

Umlaut's program is a unique opportunity for hands-on experience in problem-solving, marketing, communication, teamwork, and leadership. We strive to create a flexible and welcoming environment for our board, our volunteers, and our foster youth.

Becoming a board member of Umlaut is not only a rewarding experience, but it is a **time commitment**. We meet **around once a month** to discuss and properly plan for Umlaut's upcoming events. Most of your work time will come from individual work I will assign.

Let me introduce myself. I am Phoebe Tang, and I am currently the CTO of Umlaut foundation. I am a senior at AVHS and I enjoy working with Software Engineering. As the CTO, I am responsible for maintaining Umlaut Foundation's website. I am also working on developing an App for Umlaut Foundation. As my shadow, you will be working with me on finishing the App for Umlaut Foundation.

Taking on this role is a significant challenge, so if you have any questions, please direct your email to *Phoebe Tang* at [umlautfoundation@gmail.com](mailto:umlautfoundation@gmail.com)!

# INSTRUCTIONS

Please upload the **assignment** to the form as a **pdf** titled “**STO-webpage**”

Record the first assignment as a link, and type out the rest of the assignment below. I included a sample submission doc to clarify what I’m looking for. If you would like to keep your project private, share it with me, and on the Airtable submission form attach a blank screenshot instead of the assignment, and I will know to look at my shared files. I have attached my user information down below.

# ASSIGNMENT

1. Design a web page that serves as a “about you” page. This page can allow you to let me get to know you more. It can also be your chance to show off your html/css/js skills. I will accept submissions via github, Repl, or google drive. Screenshots of the page are unacceptable since I want to see your code to create the page. Make sure you include all resources used in your submission so that the page looks as it was intended on my screen. Also the page does not need to look professional! It is completely okay to not know too much html/css/js as long as you have the drive to learn. I value hard work and passion > talent. :)
  - a. [Reference 1](#)
  - b. [Reference 2](#)
  - c. [Reference 3](#)
2. In your opinion, what makes a website a good website? (50 - 200 words)
3. Tell me about a time you took on a challenge. (no word limit restrictions)
