## LiteDisc

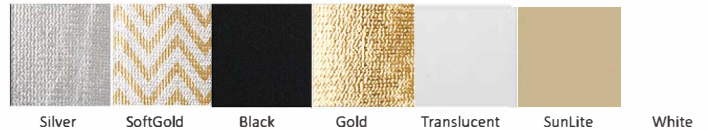

There are six sizes of LiteDisc:

**NOTE:** Some surface combinations are not available in every size.

- 12" (30cm)
- 22" (56cm)
- 32" (81cm)
- 42" (107cm)
- 52" (132cm)
- 41x74" Oval (104.14cm x 187.96cm)

LiteDisc reflectors are available in six surfaces:

- Translucent
- White/Gold Reversible
- White/Silver Reversible (not available in 52" & Oval")
- Soft Gold/White Reversible
- SunLite/White
- Silver/Gold Reversible
- Black/Silver Reversible (available only in 12" & 42")

## Opening and Re-Collapsing the LiteDisc

1. Remove the LiteDisc from the protective carry bag.
2. The LiteDisc is twisted and collapsed to fit into the carry bag. Slowly and carefully unfold it until it is completely open.
3. To collapse the disc for storage, place one hand up and one hand down on opposing edges of the disc.
4. Twist one hand toward the other.
5. Continue twisting, folding one side over the other.
6. The LiteDisc will now resemble three hoops.
- 7/8. The collapsed LiteDisc can now be sized to properly fit back into the bag.

You can use a LiteDisc to enhance your photos

In the studio

For shooting nature

Diffuse light indoors or outside

Extended length 50"/127cm  
Collapsed length 28.5"/72.4cm

up to 69.5"

up to 50"

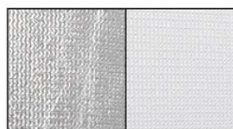

#### Available LiteDisc Fabric Colors

**Translucent fabric** diffuses light and produces a broad light source with a softening effect.

**White:** Use to reflect light with natural looking results.  
**Gold:** Use for a strong warming effect in your lighting.

**White:** Use to reflect light with natural looking results.  
**Silver:** Use to increase specular highlights adding more contrast to your image.

**SunLite Fabric:** The SunLite surface will bounce direct sunlight or harsh studio light onto your subject without the blinding effect of the highly reflective mylar<sup>®</sup> surfaces. It uses a silver/gold cross hatch design

**Gold:** Use for a strong warming effect in your lighting.  
**Silver:** Use to increase specular highlights adding more contrast to your image.

**Black:** Use as a flag to block light, sometimes referred to as "negative fill".  
**Silver:** Use to increase specular highlights adding more contrast to your image.

**Soft Gold:** Use for natural-looking, warmer reflected light. Soft Gold combines silver and gold in a zig-zag pattern for a warm, summery feel that works great with skin tones.  
**White:** Use to reflect light with natural looking results.
