NewCashmere™

Nm. 2/27
100% Cashmere (WS)

Solo i velli più fini e più lunghi, provenienti dalla Mongolia Interna e selezionati da Lora & Festa, sono utilizzati nella produzione del filato NewCashmere™. L'esclusiva sofficità e finezza sono dovute alle temperature rigide a cui le capre Hircus cashmere si sono adattate negli altipiani dell'Alashan. Queste speciali condizioni climatiche favoriscono lo sviluppo di un sottopelo caldo e morbidissimo, quasi impalpabile, composto da fibre del diametro tra i 15 ed i 16 microns e lunghezze superiori ai 38 millimetri.

IMPIEGO

1 filo finezza 12 - cotton 21/24 gg.

SOLIDITÀ

Rispondenti alle norme AWI-WOOLMARK.

Per maglieria rigata richiedere solidità specifica. I colori contrassegnati con  richiedono l'utilizzo di componente ottico, pertanto possono presentare una ridotta solidità alla luce.

Only the finest and longest fleeces from Inner Mongolia's Alashan region are sourced by Lora & Festa for the production of the NewCashmere™ yarn. The yarn's unique softness comes from the traditionally herded Hircus cashmere goats who have adapted to the region's high plateau and rigid climate. These special habitat conditions induce the goats to grow a very soft, warm and almost impalpable undercoat of fibers that are in between 15 and 16 microns in diameter and greater than 38 millimeters in length.

APPLICATION
