

Metal Drum Base Heater

Drum base heaters are specifically designed to reduce the viscosity of products or melt solids so they can be poured.

Applications

Typically used for:

- Reducing the viscosity of greases, fats, and oils.
- Heating chemicals, paints, and adhesives.
- Warming syrups such as honey, while protecting the beneficial components of the product.

Features and benefits

- Works well in conjunction with Argus Heating drum heating jackets.
- Digital controller with a range of 0-120 °C offers precise temperature control.
- Can be used for a range of products.

Construction

- Rugged stainless steel, reliable silicone heater mat, and high density Rockwool insulation.
- Size: 550 mm diameter base. Weight: 15 kg.
- Manufactured and tested in accordance with AS/ NZS 3100. 230 V 50 Hz supply 900 W.
- Two-metre power cable with moulded 3-pin plug.
- Digital controller range: 0-120 °C.

Specifications

Stock code	Drum type (L)	Dimensions (mm)	Wattage (W)	Voltage (V)
DH100	200	550 dia. x 100 high	900	230

Drum base heaters are designed to reduce the viscosity of products or melt solids to a temperature at which they can be poured. They can also be used with heated jackets.

Left: drum fitted on heater. Right: optional insulated jacket.
