

Cable Heaters

Argus Heating supply a range of cable heaters suitable for a wide variety of applications.

Applications

Typically used for:

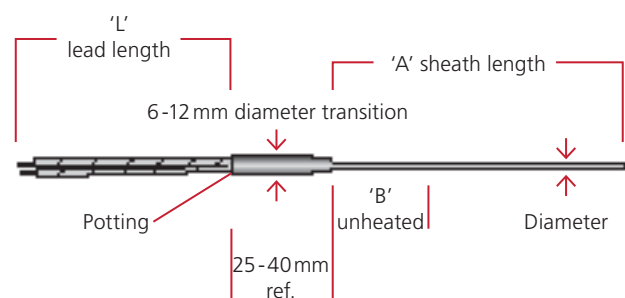

- Heating liquids, gases, plastics, and molten lead.
- Used as an semi-permanent emergency replacement solution for mica bands.
- Constant heat for pipe and tank heaters in production environments.
- Precise heat for pharmaceutical equipment heaters.

Features and benefits

- Fast heat response times.
- Maintains heat and desired temperature for long periods.
- Can be custom formed into any shape.

Construction

- Each heater fitted with K-type thermocouples
- 1.1m long metal braid covered Teflon leads – 'L'
- Annealed sheaths
- 100mm cold zones – 'B' (unheated)
- Tested in accordance with AS/NZS3760-2010+A2

Cable heaters are a versatile heating element and are often used as an emergency replacement for mica bands.

Specifications

Stock code	Wattage	Diameter	Heated length	Overall length 'A'
MH0022	1kW	4 mm Ø	2000 mm	2100 mm
MH0024	800 W	4 mm Ø	1600 mm	1700 mm
MH0023	600 W	4 mm Ø	1200 mm	1300 mm
MH0004	400 W	4 mm Ø	650 mm	750 mm
MH0003	315 W	3.5 mm Ø	570 mm	670 mm
MH0002	200 W	3 mm Ø	400 mm	500 mm
