

Renewable Energy Asset Management

VALUE IMPROVEMENT
FOR YOUR ASSETS

About Us

At KRA Renewables, we provide energy solutions to clients across all built environment sectors. We have developed a strong portfolio of renewable projects across all sectors. Our extensive knowledge of renewable energy projects allows us to deliver innovative and tailor-made solutions for your assets.

Optimise your asset's performance, and longevity

The continual supervision of renewable assets' the technical, financial, and administrative tasks necessary to achieve financial out-performance of a portfolio. In today's renewable energy market, asset management has become more critical than ever as it ensures efficient operation of the plant, increases profitability and greens the company's business processes.

KRA Renewables' asset management services offer an opportunity to retain and improve the value of the assets. Incorporating operation and maintenance procedures optimises your installations' performance and energy yield with preventive and corrective measures that reduce risks and avoid potential downtime.

Our client-focused approach is designed to lead you smoothly through all stages of your projects. We employ our in-house engineering and expertise across an expansive range of competencies designed to ensure the continued success of your project, now and into the future.

Reliable Operations Support

Our Asset Management Team provides your renewable assets with comprehensive risk estimation, mitigation, and financial energy management support.

We establish continuous adherence to legal and contractual policies and maximise your renewable assets' technical performance to secure healthy investment returns.

As independent asset managers, our extensive relationships with local suppliers, equipment manufacturers and service providers allow us to determine the most effective solutions and technologies to achieve your requirements.

We keep optimising your commercial and financial contracts to optimise the usage of the best market conditions for portfolio purposes.

“

As most renewable energy assets begin to move into their operational phase throughout Ireland. There is an increasing need for effective management of solar PV assets, that's why our team of dedicated asset managers monitors asset portfolios on a daily basis, reducing downtime and risk for PV assets.

”

Finnbar Howell

Our Technical Services

Helping you to achieve your sustainable goals

GLINT & GLARE

Guidance from industry experts

As part of our Solar PV offerings we also offer support services that assess the potential of glint and glare assessments as part of planning applications. As part of this process, we assess the potential for the panels, frames and supports to be reflective.

SOLAR PV FEASIBILITY STUDIES

Guidance from industry experts

Our team of industry experts is proficient in conducting project feasibility studies to evaluate project viability, enabling developers and clients to make an informed decision on future solar pv system investments.

DRONE SURVEYING

Higher accuracy

KRA is constantly increasing the integration of drones into our services, from surveys of rooftops with no access, modelling of complex buildings for PV design, promotional photos and videos for our client's marketing, to technical surveys of large areas of land.

Achieve your sustainability goals with our range of technical consulting services for increased efficiency and reduced waste.

PLANNING PERMISSION

Planning and development experts

Our in-house team of engineers and renewable energy experts can guide your project from its inception to build-out and operation. We take the lead on planning applications to ensure that planning permissions are in place and provide critical inputs with every step of the way.

GRANTS

Setting you on the right path

KRA Renewables helps companies by setting them on the right path relating to grant aid, undertaking the necessary Energy Audits for grant programming, supplying grant programmes, and coordinating the grant process.

TENDERING

Offering greater control

We develop requests for tender packages, compile technical specifications for the project, carry out contract negotiations and tenders, and make recommendations tailored to the project and client's needs.

We Are Independent Assets Managers

KRA Renewables' multi-disciplinary team is backed by its sister company's 21 years of experience in project management, building surveying and design to offer a refined experience in expansive project maintenance at a high commercial level.

At KRA, we use systems, technical and administrative methods that are designed to enable fast and efficient transitions between each project phase.

Our industry-specialised team coordinates and supervises all assets, offering a coherent approach and single point of contact, preparing comprehensive technical and financial reports adapted to the client's individual needs.
