ULDs are unit load devices developed for the safe, secure and efficient transportation of baggage and cargo by air. ULDs are designed and made to ensure reliable load restraint during flight and on the ground. This training course has made reference to the current edition of IATA ULD Regulations (ULDR) that provides the primary technical specifications and general functional guidance for the management, handling and control of ULDs.

Objectives

Upon completion of the course, participants will:

- Know what is required to ensure 100% safe and efficient ULD handling
- Apply IATA ULDR effectively for acceptance, buildup and loading
- Get familiar with ULD handling systems and supporting equipment
- Fulfill the responsibilities as an Air Operator (airlines) or a Ground Service Provider (GSP)
- Understand the critical conditions and risks of ULD handling

Course Outline

- IATA ULD Regulations and Ground Handling Procedures
- Operator's and Service Provider's Responsibilities
- Classification and Identification
- ULD Inspection and Operational Limitations
- Acceptance, Buildup and Aircraft Loading Procedures
- Special Purpose ULDs
