

WILDNITE

The young hard rockers from Wildnite started up back in 2012. Within two years the band found their sound which was heavily inspired by the 80's hard rock scene. The band released their first single in 2016 and continuously released singles until the release of their debut album in 2018. Wildnite have been touring in Europe and has played a bunch of concerts since. The group has been working on their second studio album "Symphony Of Apathy" during the last couple years, which they are planing to release in early 2022.

About the single:

F.U.B.A.R. This song is a banger for sure! This is the first song we made for this album and it's probably the most heavy and driving song on it. Whenever we play this song live, it doesn't take long before you can see fists in the air, which is like the best feeling ever! F.U.B.A.R. is a military slang for "fucked up beyond all recognition", and because the song is all about war, we thought that it was a suiting theme. It includes heavy riffing, heavy vocals and a driving drum beat that punches through everything in its way.
