

Wildnite

The young hard rockers from Wildnite started up back in 2012. Within two years the band found their sound which was heavily inspired by the 80's hard rock scene. The band released their first single in 2016 and continuously released singles until the release of their debut album in 2018. Wildnite have been touring in Europe and has played a bunch of concerts since. The group has been working on their second studio album "Symphony Of Apathy" during the last couple years, which they are planing to release in early 2022.

About the single:

MONSTER. This is the last song of the album. We sure didn't hold back on this one! It starts off with some badass riffing, which then leads to a monstrous chorus (get the reference?)

It really sticks to your brain once you hear it! We feel like this song includes all the aspects of the album with its rawness, softness and catchiness. This is why we think it fits perfectly as the last song on the record.
