— ABOUT

## Suppliers of custom packaging for more than 50 years

When it comes to service, we pride ourselves on delivering the best assistance to help you package your professional or emotionally valuable objects in the most suitable way to keep them safe. Over the years we've encountered many uniquely interesting challenges to do just that. It is not uncommon for us to develop a prototype and rigorously test it, to see if it is fit for purpose. Tweaking and adjusting, until we have developed the custom-made solution for each client.

— FOAM SPECIALISTS

# Index

Packaging	4
Casing, case inserts & camera case inserts	5
Tool case inserts, computer case inserts & cartons	6
End-caps	7
Foam products & sound proofing	8
Carpet wedges, foam sheets & kneeling pads	9

— PACKAGING

# From custom inserts to a complete packaging solution

Adfoam specialises in creating custom foam solutions for your packaging needs. From creating custom inserts for your existing casing to delivering a complete packaging solution. We supply e.g. Pelican, Storm, Nanuk and a diverse range of plastic casings to suit your needs.

## — CASING

# Optimal protection for your sensitive products

Adfoam is a proud supplier of Pelican, Storm and Nanuk casings. Of course, we can supply most brands and a diverse range of plastic casings to suit your specific needs. We can even screen-print the cases with your name & logo to match your company colours.

## — CASE INSERTS

# Innovative custom foam inserts

Do you need to send a fragile shipment anywhere in the world and would like a complete packaging solution to protect your goods or specialised equipment? Is your current foam insert that came default with your case giving you grief. Adfoam's innovative custom foam inserts might be the answer.

## — CAMERA CASE INSERTS

# Innovative custom foam inserts

Adfoam can create custom-made inserts for your equipment and cases.

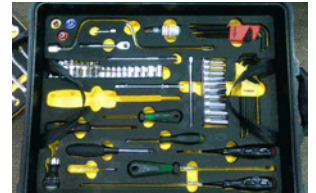

#### — TOOL CASE INSERTS

## Safe, secure and organised

Are you tired of the default foam that came with your case breaking away after only weeks/months of use? Adfoam can provide a custom foam packaging solution for your tool cases that will be innovative and will last years. We can customize CNC foam inserts for any cases brought by customers.

#### — COMPUTER CASE INSERTS

## Secure your tablet, laptops and other equipment

Adfoam can create custom-made inserts and/or casings for your computer equipment. Special Anti-Static foams can be specified for use with PCBs and sensitive electronic equipment.

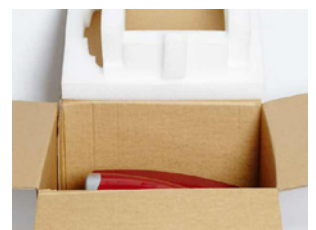

#### — CARTONS

## Safely box it up, ready to ship

We can supply low quantities (10,20 or ??) of custom-made twin cushion boxes to fit your packaging needs. Custom sized box with polyethylene lining, with added convoluted foam for protection to store an object with inner dimension 585 X 585 X 330.

We can make customized, low run boxes of any shape (limited by our sheet size) to fit your needs.

“Exceedingly excellent with the customer services. Vic and Matt go the extra mile in meeting the requirement. With their help and support, we managed to meet our customer target.”

RAYMOND D.

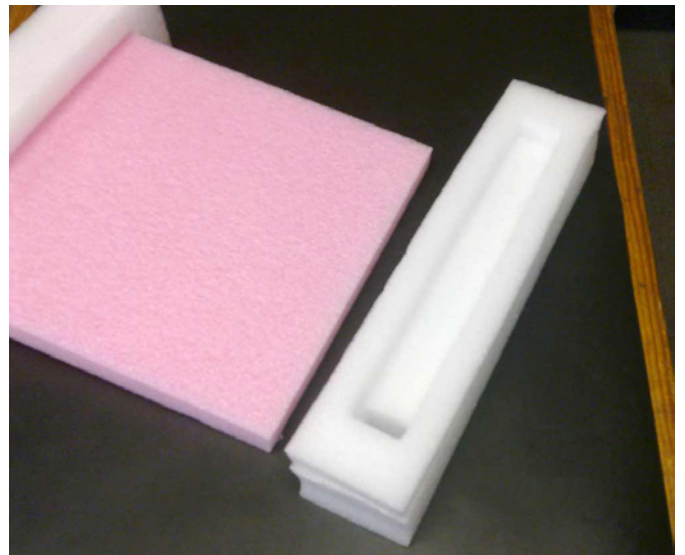

— END CAPS

## Shifting products now in the past

If your items need to be transported overseas end caps will provide support to items. Materials used for packaging can be polyethylene (PE), and polyurethane (PU) depending on your needs and the size of the production run.

Special anti-static foam can be specified for use with PCBs and sensitive electronic equipment.

Adfoam can custom-design and supply a total packaging concept for a variety of products - from a simple insert for cartons, to complete shipping cases.

— FOAM PRODUCTS

# From sound-proofing the teenage bedroom to saving your knees, we've got you supported.

Adfoam also has ready-made foam products for your ordering convenience. From knee-pads to carpet wedges and soundproofing sheets. These products are available for pick-up after placing your order or discuss whether delivery or shipping is possible. Special anti-static foam can be specified for use with PCBs and sensitive electronic equipment.

— SOUND PROOFING

## Acoustic Foam

This product is a combustion modified flexible foam designed for acoustical absorption applications. It is specifically designed to comply with the American Underwriters Laboratories flammability test UL94, classified 94HF-1.

Check out relevant pricing on the website.

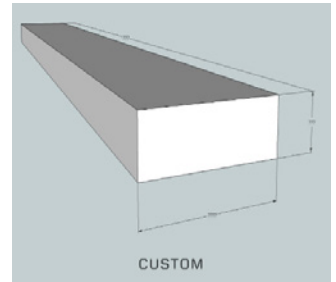

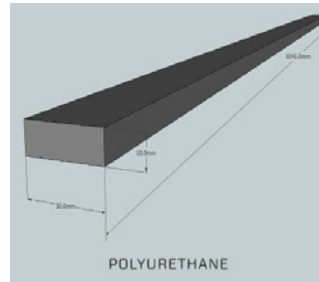

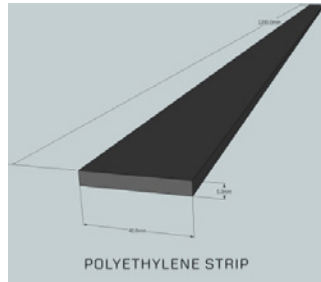

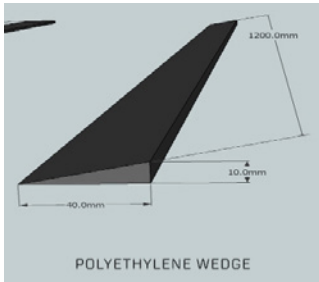

## CARPET WEDGES

# Custom-made Carpet Wedges

Wedges can be customized to your needs. Provide us with the dimensions you need or request a sample pack (Minimum order quantities apply\*).

- Cross Linked polyethylene wedge 1200x40x10mm
- Cross Linked polyethylene strip 1200x40x5mm
- Polyurethane 1040x30x10mm
- Custom ??x??x??mm. Supply us the dimensions of the strip you require\*

## FOAM SHEETS

# Need a DIY foam solution

You can purchase our foam sheets by the square metre or in full sheets (100x100x10). We stock a range of types and thicknesses which can be custom cut to suit your needs.

**Check out relevant pricing on the website.**

## KNEELING PADS

# Give your knees a break

Adfoam can provide you with foam kneeling pads to ease the pressure on your knees when your work demands so.

**Check out relevant pricing on the website.**

— PROMOTIONAL

# Designed to suit your promotional challenge

Adfoam has standardised foam signage sizes available for your quick promotional ordering ease. Of course products can be customised with branding and / or alternative sizing or cut-out requirements. In the past, customers have used our promotional foam products not just for packaging their product but also as durable (directional) signage, for lightweight branding options or in-store promotions.

— SIGNAGE

## Lightweight and durable

We can create your foam signage with a maximum size of 2000x1000mm.

Check out relevant pricing on the website.

# Let our experts guide you to the best choice for you

Your specific need will determine the foam type Adfoam will use for your custom-made foam solution. Ranging from non-static to soundproofing, from cost-efficient freight weight to ultra shock

absorbent and a whole range of mix and match options in between. Let our experts guide you on the best choice for you, based on how you'd like it to perform.

## 1. Non cross-linked polyethylene

This material is recommended for high-value products over 10 kilos. Because of the thinner cushions needed, designs using this material often have cheaper cartons and therefore reduced shipping costs.

## 2. Cross-linked polyethylene

This product is best for die-cutting to display, or for case inserts.

## 3. Plastazote

Plastazote is the ideal choice for exquisite packaging, promotional or sales case inserts.

## 4. Flexible polyurethane

This foam is 97% air, 3% plastic and contains only carbon, nitrogen and hydrogen molecules. Main use in bedding and upholstery. It is ideal for packaging electronic goods and computers when very low levels of shock (less than 40 G's) are required.

## 5. Convoluted polyurethane

Convoluted polyurethane has varied uses from case lids to sound proofing. It is also called egg crate foam owing to the visual shape. We can provide convoluted foam in various convolutions such as 10/20, 20/40 and 20/50mm.

Visit [ADFOAM.COM.AU/FOAM-TYPES](http://ADFOAM.COM.AU/FOAM-TYPES) for more information.

## Professionals in custom foam packaging solutions

When it comes to service, we pride ourselves on delivering the best assistance to help you package your professional or emotionally valuable

objects in the most suitable way to keep them safe. Over the years we've encountered many uniquely interesting challenges to do just that. It is not uncommon for us to develop a prototype and rigorously test it, to see if it is fit for purpose.

From intake and measuring to producing and fitting we have assisted in packing anything from heavy-duty machinery to state of the art professional equipment, to the smallest, yet highly sensitive, instruments.
