

PTP CLEANER

Overview

Pro-Tech Cleaning Concentrate is a 100% bio-degradable cleaning agent diluted at a 10:1 ratio with water to effectively remove dirt and other surface contaminants from a variety of existing surfaces. This environmentally safe cleaning agent will not harm animal life, ground vegetation or its inhabitants.

Basic Uses:

Pro-Tech Cleaning Concentrate will effectively clean existing roofing substrates such as smooth or granulated build-up, modified bitumen, metal, single-ply and previously coated surfaces. This product is also effective for cleaning concrete, walls and pedestrian and vehicular traffic deck coating systems.

Packaging and Mixing:

Pro-Tech Cleaning Concentrate is a single-component material available in 1-gallon containers.

Installation:

Pro-Tech Cleaning Concentrate when properly diluted at a 10:1 ratio with water will treat an area of 150-200 sq. ft. per diluted gallon. Allow diluted material to stand a minimum of 15-20 minutes and pressure wash surface utilizing equipment with a minimum of 2000 psi capability. Heavily soiled areas may need additional treatment of cleaning solution with a stiff bristled broom prior to pressure washing. Always ensure to rinse the substrate thoroughly to remove any traces of cleaner residue and allow surface to dry thoroughly.

Technical Service:

Additional information, product brochures and guide specifications are available. Customized application instructions are also available from our technical experts.
