TPS Standard Cost History Documentation

TPS Standard Cost History is a Microsoft Dynamics 365 Business Central app to track standard cost history at the time of implementing a standard cost change. The app also allows the standard cost, indirect cost %, and overhead rate fields on the item card to be made non-editable to ensure the functions on the standard cost worksheet are used to update these values.

Setup

ASSISTED SETUP

1. Search for **Assisted Setup** and open the page.
 2. Complete the wizard registration under **Standard Cost History** to start using the app.
 3. Assign **TPS STD COST HISTORY** permission set to users in order to access the additional tables.
 4. As part of the activation additional base single level and rolled-up cost fields are shown on the **Item Card**.
-

STANDARD COST HISTORY SETUP

1. Search for **Standard Cost History Setup** and open the page.
2. On the page there are two fields on the **General** tab.
 - a. The **Enable Standard Cost History**, once activated, tracks changes into a new table at the time of running the **Implement Standard Cost Changes** from the **Standard Cost Worksheet** ribbon.
 - b. The **Disable Std. Cost Edit** field makes the **Standard Cost**, **Indirect Cost %**, and **Overhead Rate** fields on the Item record non-editable. The **Indirect Cost %**, **Overhead Rate**, and **Standard Cost** fields are now controlled using the **Standard Cost Worksheet**.

Standard Cost History Setup

General

Enable Std. Cost History ☒

Disable Std. Cost Edit ☒

3. Once selections are made, close the **Standard Cost History Setup** page.
4. Depending on the fields enabled, either or both the ability to track standard cost changes and/or the ability to prevent direct edits to the item record fields will now be active.
