

SIGNAL (SGNL) IS AN NFT AND CW20 TOKEN-BASED ALTERNATE REALITY GAME IN COSMOS.

THE SIGNAL HAS ARRIVED — 01

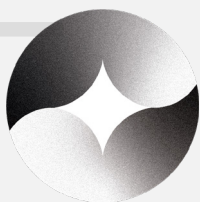

Transmissions of unknown origin have arrived on Earth. They have been released to the public for analysis. As a participant in Signal, your role is to unlock this mystery while collecting unique pieces of art and rewards across the Cosmos ecosystem.

Our NFT series consists of unique pieces of art that contribute to a grand story arc. Each collection will allow individuals to hold pieces of the puzzle that can be shared to discover lore, solve challenges and win prizes.

The Signal token acts as our community interface. We will reward participation, puzzle solving, and roleplay across a 12 month story. Holding, LPing, and staking Signal will provide eligibility for NFT drops, whitelists, event participation as well as POAPs and other rewards.

Our initial story will unfold over 5 acts spanning the first year of this project. We aim to provide a fun, engaging, and memorable community experience that will become a hub for world building in the Cosmos ecosystem.

SIGNAL TOKEN

THE CW20 SIGNAL TOKEN — 02

Signal token provides the community interface for the project as well as DAO entry.

Signal will be a mechanism for providing rewards to participants for in-universe engagement (e.g. solving puzzles, world building and deciphering lore) as well as contributions to project and community development.

Holding and LPing Signal may provide exclusive bonuses such as NFT drops or whitelisting, POAPs, and more. The burn function of Signal will also be employed for key purposes at later stages.

Value capture for Signal Token will be expanded through DAO activities, deflation, and DAO treasury expansion in later acts.

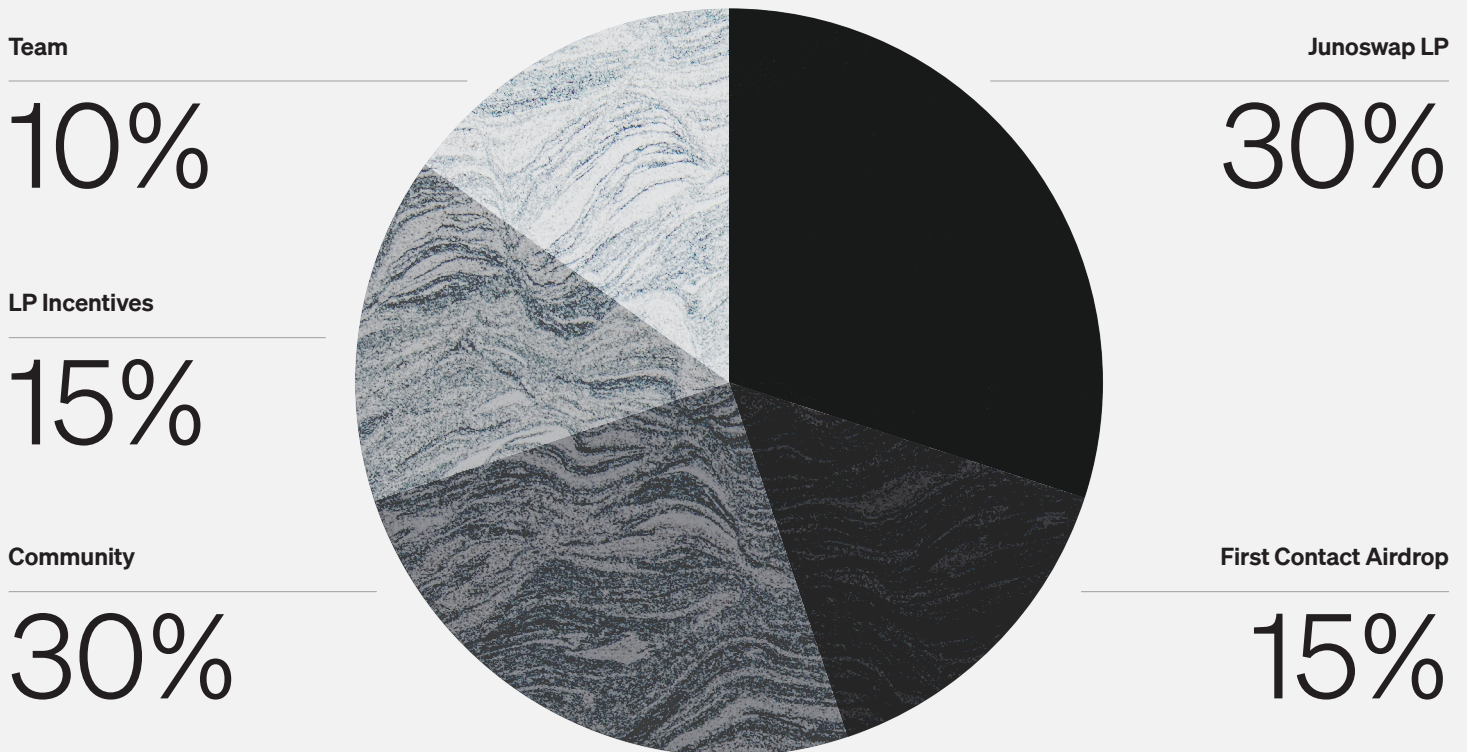

NFT COLLECTIONS — 03

Our first series of NFT collections will be released across a five act structure with an engaging in-universe story that parallels the real-world development of the Signal community. The culmination of each act will result in a major NFT collection release for participants to own and collaboratively decode.

These NFT collections provide clues about the motivations, history, culture and message of the transmissions. Each transmission is an essential piece of the puzzle for participants to own, with additional exclusives for accomplishing sets and objectives through collaboration or as individuals.

TOKENOMICS — 04

SIGNAL (SGNL) IS A BURNABLE TOKEN WITH A FIXED SUPPLY OF 1,350,000.

30%: Junoswap LP

405,000 SGNL will be provided to the SGNL/JUNO LP on launch. This supply will not be removed unless decided upon by the community at a later date via DAO governance.

15%: LP Incentives

202,500 SGNL will be provided in LP incentives once contracts are operational on participating exchanges.

15%: First Contact Airdrop

202,500 SGNL will be released in a staggered airdrop this spring to stakers in key Cosmos chains. All unclaimed SGNL from this airdrop will be burned.

10%: Team

135,000 SGNL will be allocated to the Project Team and will be immediately staked with the Signal DAO.

30%: Community Fund

405,000 SGNL will be allocated to the community fund. The community fund targets include: project costs, marketing, rewards and giveaways.

GENESIS GOVERNANCE — 05

SIGNAL WILL LAUNCH WITH DAO GOVERNANCE AND 810,000 SGNL (60% TOTAL SUPPLY) IN THE DAO TREASURY.

DAO Treasury: 810,000 SGNL

60%

Community Pool: 405,000 SGNL (30%)
First Contact Airdrop: 202,500 SGNL (15%)
LP Incentives: 202,500 SGNL (15%)

Junoswap LP: 405,000 SGNL

30%

- Secured by developer team wallet
- Locked until DAO governance decision

Team: 135,000 SGNL

10%

- Shared wallet of artists, developers, and game design team
- Securely staked to DAO

Signal Supply And Governance Is Designed With The Following Priorities:

- | | | | |
|--------------------------------------------------------|---------------------------------------------------------|------------------------------------------------|------------------------------------------------------|
| 01 Healthy tokenomics and distribution schedule | 02 DAO control of the majority supply at genesis | 03 Progressive project decentralization | 04 Project team transparency & accountability |
|--------------------------------------------------------|---------------------------------------------------------|------------------------------------------------|------------------------------------------------------|

28 DAY

Unstaking Period

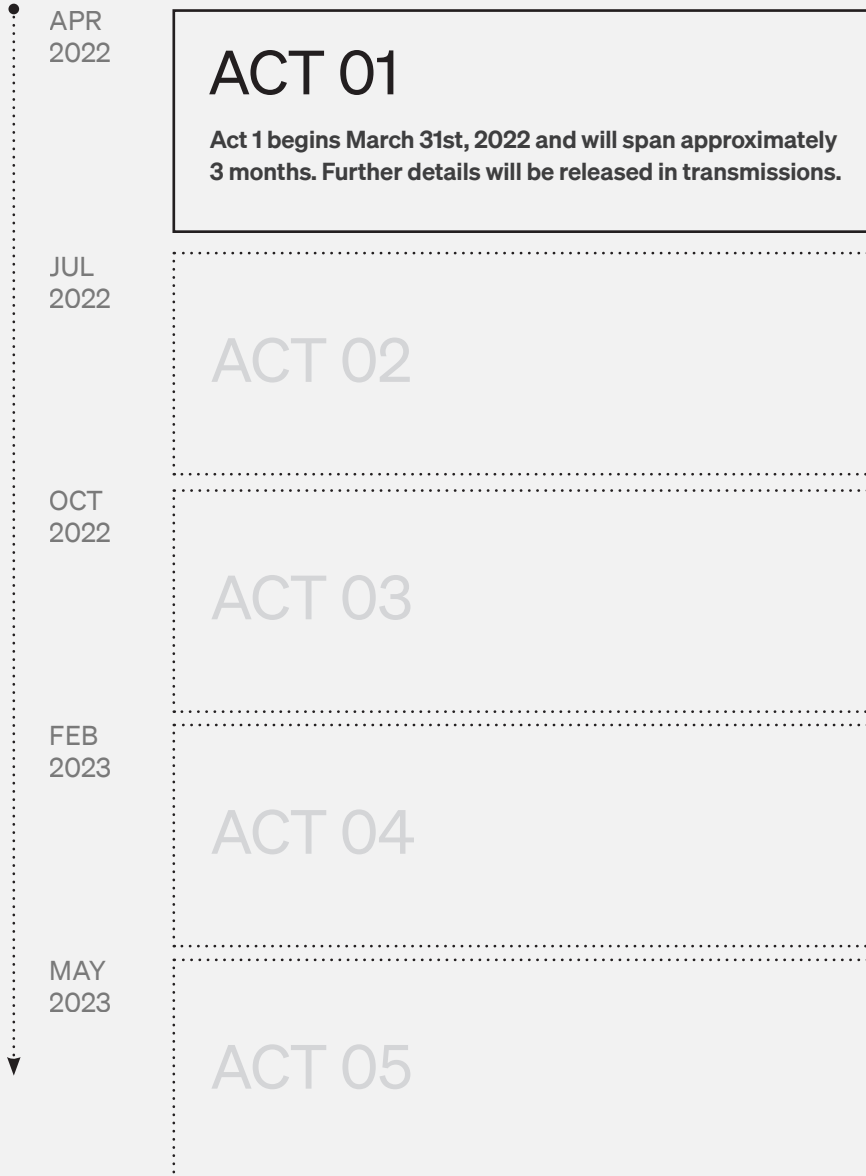

Signal DAO will launch with a long (28 day) unstaking period to ensure the project team supply is secure from genesis.

In Act 1, DAO staking will only provide voting rights on proposals. Rewards for DAO participation are planned for later acts.

PROJECT TEAM — 06

This project is created by committed members of the Cosmos community who choose to remain anonymous. We welcome feedback on our processes at any time through our official channels on Discord and Twitter.

PROJECT TIMELINE — 07

Signal's five act structure will take place over approximately 12 months from April 2022 to May 2023. It is designed to develop organically through an emergent narrative that blends real-world project developments with in-universe challenges. Plans for later acts will be released in conjunction with key plot developments.
