Data Subsystems, Inc., a leading software and [web development](#) company, has launched a new Q&A service on the renewable fuel and alternative energy investing web resource www.BionomicFuel.com. With the help of this new service visitors can post their own questions to the specialists if they can't find the answer on the website.

(Vocus) March 25, 2010 -- Data Subsystems, Inc., a leading software and web development company, has launched a new Q&A service on the [renewable fuel](#) and alternative energy investing web resource BionomicFuel.com. With the help of this new service visitors can post their own questions to the specialists if they can't find the answer on the website.

“We’re committed to excellence in search engine optimization and user experience improvement”, commented the president of Data Subsystems, Inc., Alex Shortov “With the help of this new Q&A system on the web site people will be able to ask directly the questions that bother them the most and receive professional answers. This is one of the many advanced techniques we combine to successfully promote our clients on the Internet.”

BionomicFuel.com is one of the top destinations for people that are interested in green energy, care about the future of Earth and don't mind making money on the growing alternative energy market. It focuses on two major subjects. The first one is renewable energy generation, bio fuel production, ecology and global warming issues. The second subject is alternative energy investing, green energy funds and financial planning. The website pays a lot of attention to [penny stocks](#) of developing alternative energy companies as a great investment option. It shows that that renewable energy not only protects the environment, it is also a profitable business.

BionomicFuel.com is a start up project of Legacy Biotechnologies, Inc., a private nutraceutical and cosmeceutical company headquartered in Tampa, FL. It was developed and marketed by Data Subsystems, Inc., an experienced IT company that specializes in software, web development search engine optimization and [search engine marketing](#), also known as DataSub. The website is only a year and a half old, but it is already very popular and receives thousands of unique visitors per day. The project itself became profitable in less than a year of development. BionomicFuel.com owes the success to professional development and marketing strategy of Data Subsystems, Inc. The web site benefits from custom engine and content management system that was developed by DataSub. The engine is completely SEO optimized. It uses Google friendly URL addresses, optimized internal linking, page titles, etc. Even the image keywords are SEO friendly. Every article on the website is reviewed by professional search engine optimizer before publication for maximum performance. The project has its own newsletter and RSS feed. Marketing techniques include related external links building, social news promotions, blog promotions, etc. While being Google friendly, the web site engine is also user friendly. This unique combination is what makes the project so successful.
