### **FASTAR**

---

#### **Case: 45076 Canceling Research invoices**

When a FAST Research invoice is cancelled from the FAST AR application, the invoice status on the FAST Research side will now show "Cancelled" instead of "Posted" and the invoice will no longer appear on the Invoice Query report.

#### **Case: 46429 Allow Batch History report to be exported to Excel**

The Batch History report can now be exported to Excel.

---

### ***Global Changes That Affect All Applications***

---

**Case: 46455 Pinned Reports Admin Report issue**

An error causing '# with View/Edit Access' column to display incorrectly has been resolved.

**Case: 46562 Add visual indicator to Document Chat button to indicate if a chat dialogue exists**

Added a visual indicator to indicate whether a chat exists/existed for that document. Currently this is used with WebReq (Requisition) and Student (Grade Approval) .

**Case: 46563 Set XLSX output row height**

Created a global system wide configuration setting #5105 "Default XLSX export row height" under Site Administration to control the row height setting when exporting reports to Excel.

**Case: 46570 Default negative values in filters**

Fixed a bug when a Numeric Comparebox filter was set to be mandatory but did not have a range set: the default value of the filter would show as -999999999999.99. It will now show a default value of 0.
