### **FASTAR**

---

#### **Case: 50361 Notifications when a payment is applied**

Created an in-application notification (bell icon in top right toolbar), as well as an email notification, to the creator of an invoice when a payment is recorded (specifically when the Deposit Number that the payment was recorded under is completed).

Configuration Settings 290 through 293 will control the email notifications.

#### **Case: 51228 Remove page header/footer lines from Excel export of GAR report**

When the GAR Aged Receivables report is output to Excel, the page header (client logo & report title) and page footer (date, page X of Y labels) will now be hidden. Some very minor changes were made to the alignment of some elements as well to ensure the best possible output regardless of format.

#### **Case: 51230 Create regular reporting page version of GAR Aged Receivables**

Created a new reporting page under Queries -> GAR Aged Receivables. This report has the same information as the PDF version under Reporting -> All Reports but it's a standard reporting page with filters and advanced options which can be used with Report Scheduler, Communication Centre, Dashboards, etc.

#### **Case: 51964 Customer Inquiry by Customer Number Report**

When the Customer Inquiry by Customer Number report returns no results, which means that particular customer does not have any outstanding balances, the report will now display the Customer ID, name and address information instead of just being a completely blank report.

---

### ***Global Changes That Affect All Applications***

---

#### **Case: 43214 Make usage of roles easier to understand**

Created a new report in each application under Administration -> Access -> Roles Usage. This report allows you to see how each Role/Group is being used.

#### **Case: 51889 Letter indicator**

A new report has been created in each application to display all the Letter Templates in the system. To access the report go to Administration -> Information -> Letter Generator Templates.

#### **Case: 52095 Institutional definitions exceeding VARCHAR2 limitation**

Very long Institutional Definitions exceeded the VARCHAR2 character limit and, when the 'Update Institutional Definitions' button was clicked for these definitions, an error occurred. These have been changed to CLOBs to avoid the character limitation issue.
