
FASTBUDGET

Case: 51968 Budget Posting Record count add header count

Batch Summary and Status report now shows the total number of records posted to Banner, INCLUDING the header record. Previously the header record was not being included in the batch record count.

Case: 52056 Added Positions > "PLBD NOT EQUAL 100 PERCENT" report

New report "PLBD NOT EQUAL 100 PERCENT" shows nbrplbd records that have distribution percentages not equal to 100%. This can help find issues if posting to PBUD from FAST.

This report is disabled by default, please contact customersupport@mcsI.com for assistance setting up and configuring the report.

FASTFINANCE

Case: 52315 Total label on Summary FOAPAL

On the Summary by GL Code report (sometimes called Summary by FOAPAL), when the Sum By filter is "[anything] - Acct" then the word "Total" on the report footer total line now says "Total Revenues Less Expenses and Transfers" which matches the way that Summary by Hierarchy and Summary by Acct Detail works.

Case: 52392 Add Fund level option to Trial Balance

Added a filter to allow users to pick the Fund level that they want to run the report for.

The Trial Balance report automatically aggregates the output based on which GL codes are enabled on the Advanced Options tab, so if all GL fields are turned off except Fund, and the level is set to a high level hierarchy (such as level 1) then the result will be a summarized report of fund balances at a high level.

FASTHR

Case: 52218 HR Current Jobs Live Reporting

Add Live Reporting option to the Current Jobs report. The user needs to belong to the HR Live Reporting security role to use this functionality.

Case: 52675 Leave Details error from 4.8.03

4.8.03 added a Leave History table, which caused old records to be displayed which was not the desired outcome. This case rolls that change back to prior logic.

FASTJV

Case: 52498 Update failure notification of recurring and auto-reversing jobs

Fixed some bugs with the notification messages when the recurring and auto-reversing jobs fail.

FASTRESEARCH

Case: 52490 Improve Administrator Maintenance screen when in edit mode

Improved the display of the Administrator Maintenance screen while the grid is in edit mode (updated widths and spacing).

Case: 52504 Javascript error when running Grant Details page

Fixed a bug introduced in v4.8.05 when loading the Grant Details report.

Case: 52687 Improvements to Invoice Query report

Added two new columns to the Invoice Query report:

- Agency (shows the Agency Long Name)
- Balance (shows the Invoice Balance)

Added a new filter:

- Balance

Updated the Invoice Date filter:

- Show comparison options

FASTSTUDENT

Case: 52140 Enrollment Planning: Add FOAPAL Crosswalk Type

A new student to finance crosswalk type column has been added to the Student to Finance FOAPAL Crosswalk page (Course Planning, Institutional Definitions menu). This field is primarily used when pushing tuition forecasts to the budget module.

Case: 52316 Update detail code filter to work with multi-select option

Detail code filters have been updated to work as "multi-select list" filters. Previously they only worked as Multi-Search Filters.

Case: 52323 Enrollment Planning: Add days/times/rooms fields, grade mode, recurrence, and waitlist capacity fields to all pages

Multiple new columns have been added to Enrollment/Course planning. You can adjust whether new columns and/or filters are enabled via the Administration tab of the report(s).

Case: 52375 STAGE_STVGMOD

New Grade Mode Code filter available and new stage table STAGE_STVGMOD exists.

Case: 52387 Transfer Course Equivalencies: New columns and data changes

Multiple new columns have been added to this report. Additionally, when the parent and/or child records did not contain a "Group" code, errant results were returned. This issue has been resolved. You can adjust whether new columns and/or filters are enabled via the Administration tab of the report.

Case: 52422 Degree Applications report - Cohort Filter issue

The cohort filter was not getting applied when running the Convocation, Degree Applications report. This issue has been resolved.

Case: 52429 Student Primary Phone changes

IMPORTANT UPDATE: The logic for selecting primary phone numbers used within student reporting (not SMS) has been updated to use the new Student Administration, Phone Groupings and Phone Grouping Types pages. The primary phone number selected in most Student reports will use the phone type hierarchy as defined for the 'Primary' phone group within these two new data entry pages. It is important to review this setup upon upgrade.

Case: 52505 Enrollment Planning: New Fields available

Course Long Text and Course Link ID have been made available within Enrollment Planning. The Course Section Number field has also been updated to be editable. You can adjust whether new columns and/or filters are enabled via the Administration tab of the reports/data entry pages.

Case: 52513 Add External Institution Detail Information to SYNCOLLEGES_EXTERNAL and STAGE_SOBSBGI

Transfer college address info including city/state/nation has been added to the Transfer Course Equivalents report in Course Info menu. You can adjust whether new columns and/or filters are enabled via the Administration tab of the report. New stage table STAGE_SOBSBGI has been added and this information has been added onto the SYNCOLLEGES_EXTERNAL warehouse table.

Case: 52551 Update Linked Courses report to look for registration overrides

Added LINKED_OVERRIDE_IND to the INVALID_REG_RECORDS table.

Updated the Registration -> Linked Course Audit report to exclude records where this value is "Y"

Case: 52581 Add Program and Degree columns to the Academic History report

Program and Degree code and descriptions have been added to the Academic History report. You can adjust whether new columns and/or filters are enabled via the Administration tab of the report.

Case: 52609 Add Curriculum Rule to Admissions warehouse table

CURRICULUM_RULE_1 has been added to FASTSTU.synADMISSION_INFO warehouse tables.

Case: 52702 Registration: List of Students, Add Billing hours

New columns including Term Billing Hours have been added to the Registration, List of Students Report. You can adjust whether new columns and/or filters are enabled via the Administration tab of the report.

Global Changes That Affect All Applications

Case: 52125 Provide user with the ability to re-size a page opened in pop-up mode

When a hyperlink opens a report or data entry screen in a popup, the corners of the popup can now be dragged to resize the popup.

Case: 52151 Add Created By label to notifications

Notifications that appear under the bell icon in the top right corner of the screen will now show a "Created By: [user name]" label to make the origin of the notification clear.

Case: 52319 Change "Save As" pinned report button to "Create"

Changed the "Save As" pinned report button to say "Create" instead in order to prevent confusion for users when they are on data entry screens.

Case: 52365 Add Searchbox to Dashboard

When adding a filter to a Dashboard, you can now choose the type (dropdown or searchbox).

Case: 52368 Page Level Administrator role issue

When the Administration tab was updated to latest layout, the access granted to the page level administration roles for each application was reduced to view only access on to limited data. This has been adjusted to allow the Page Level Administration role for each application to edit Page Options, Datagrid Columns, Datagrid Entry Columns, and Filter Options from the Administration tab of reports.

Case: 52369 Error when selecting new column in Firefox

Fixed a Firefox specific bug when enabling a new column on the Advanced Options tab.

Case: 52372 Remove restricted fields when deleting a custom report

When deleting a custom report, if that report had restricted fields, the restricted fields would become orphaned which would prevent the deletion of the role used by the restriction. This fixes the issue by removing any restricted fields from a custom report immediately before the deletion of the report is finalized.

Case: 52411 Mass Communication Summary report error

In certain circumstances the Mass Communication Summary report failed. This issue has been resolved.

Case: 52416 Prevent duplicate mixed case role names

Added additional validation to the Define Roles screen to prevent duplicate role names with different cases ex. "roleA" and "ROLEA" and "RoleA" should not be allowed.

Case: 52484 Add ability for user to check or un-check all rows on a data enter form

On a checkbox column of a FAST data entry screen, you can now select "check all" or "uncheck all" by clicking on the column header.

Case: 52552 Update Excel Import processes

Until now, FAST has required a Microsoft Data Access Component (MDAC) to be installed on the FAST web server in order to open and parse Excel files. This component is set to become unsupported in Spring 2023.

We have re-written the Excel Import processes to use a new component instead which is built into FAST so it won't require an extra component installation. After the v4.9.00 upgrade, the MDAC piece is no longer required to be installed on the FAST web server. Your IT staff can uninstall this, or we can uninstall it on request, but we won't proactively uninstall it just in case something else external to FAST is relying on this component.

When importing from Excel, everything should work as it did before, however the old .XLS file format is no longer supported so .XLSX format should be used instead. If you have an old template that uses .XLS you just need to open it in Excel and then Save-As to the .XLSX format to use moving forward.

You may also need to double check that any date cells/columns in your spreadsheets are formatted as dates rather than text or general.

Case: 52592 Oracle 19 Requirement

Starting with FAST version 4.9.00 we STRONGLY recommend upgrading to Oracle 19. If you need to stay on Oracle 12 for a short period of time please contact Millennium Customer Support to discuss this.

Case: 52605 Query Builder - context sensitive help button

Fixed a problem with the blue question mark help button on the Query Builder and Query Viewer screens.

Case: 52651 Copy a row on Auto-load Roles screen

Fixed a bug when copying a row on the Auto-load Roles screen.

Case: 52686 Form Generator

Re-branded our 'Letter Generator' premium feature to 'Form Generator.' It is now possible to use this with Single Record View on reporting screens or data-entry screens! This feature can be enabled on your TEST site upon request for trial purposes. Please contact customersupport@mcsf.com to discuss the initial setup and training.

Case: 52817 Cannot delete hyperlink variable

Fixed a bug introduced in v4.8.05 which would prevent the deletion of a hyperlink filter variable. This fix has been back-ported into v4.8.05 via patch.
