
FASTSTUDENT

Case: 53701 Admit Decision Filter

Academic decision filters in FAST were incorrectly pulling from a stage table rather than a warehouse table. This caused the dropdown lists to be blank if a refresh failed to run. This issue has been resolved.

Case: 53771 Add decision date to Check List report dataset.

The Application Decision Date is now available to be added to the Checklist report. This can be done from the Administration tab on the page. For assistance, please contact customersupport@mcsi.com.

Case: 53824 Degree Application report- address override with client override

Added the ability to choose which address type to display within the report via the Page filter options.

Case: 53854 Primary Contact Info: Possibly returning multiple rows

If primary phone type is specified within Administration, Phone Groupings, and a student has more than one active phone number of the same type, it is possible they might be getting returned with two records in the FASTSTU.SYNPRIMARY_CONTACT_INFO warehouse table, when they should have only been returned once.

Case: 53871 Admissions Checklist: duplicate records returned

In some circumstances, where students had multiple student levels throughout their student career, duplicate records were being returned by the admissions checklist report. This issue has been resolved.

Case: 53881 Personal Info report: Add a birthdate filter

A new birthdate filter has been added to the available filter options within the Administration tab of the Personal Info report. Filter options can be adjusted via the Administration tab of the report.

Case: 53882 Academic History- Transfer History Error

When the academic history report was executed with the "include transfer history" filter box checked, and error was raised. This issue has been resolved.

Case: 53899 Convocation Degrees Granted report: Add email override option

A new 'Email Type Override' filter has been added to the Convocation, Degrees Granted report. This filter allows you to override the default student email with an email address of a specific type. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Case: 53906 Create warehouse table: COURSE_LEARN_OBJECTIVES

New student warehouse table, SYNCOURSE_LEARN_OBJECTIVES, has been added to FAST.

Case: 53912 Add new level and major columns

Multiple Student Level and Major columns have been added to the Student General Info report, Student Account Receivable List report, and the Student Account Balance report. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Case: 53930 Admissions Info: Add Full Time/Part Time Ind

New full time part time ind column has been added to the Admissions Info report. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Case: 53947 Course Summary and Enrollment Summary reports: Add Learning Objectives

Added 'Learn Objective' column to both the Course Summary and Enrollment Summary reports.

Case: 53948 Course Catalogue Descriptions and Learning Objectives

Course Catalogue Descriptions and Learning Objectives have been added to the Active Course Catalogue report. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Case: 53983 Student to Finance FOAPAL Crosswalk: Add Course Institutional Definition option

The ability now exists to use course/faculty institutional definitions within the Student to Finance FOAPAL crosswalk for Enrollment Planning & Forecasting. These new columns are deselected by default. You can adjust whether new columns and/or filters are enabled via the Administration tab of the report.

Case: 54009 Admissions report: Add filter for application date

A new filter for application date has been added with dynamic date filter options available. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Case: 54010 Admissions Checklist report

New filters for Deadline Date and Received Date have been added with dynamic date functions enabled. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Case: 54028 Add course repeat and override information to Wait List report

Changes have been made to calculate the number of times a student has previously taken the waitlisted course. Report now also includes course override information.

Case: 54100 Allow Last Name to be blank

Updated FAST student to allow for blank last names.

Case: 54123 Detail Code Filters

Updated Detail Code filter boxes to include both detail code and description rather than just description. This helps when the filter is used on data entry pages. Also added additional filter type options for the detail code filter.

Case: 54207 New Indicators to SYNID_TO_NAME

New columns added to SYNID_TO_NAME warehouse table:
SOCIAL_INSURANCE_IND,
SOCIAL_INSURANCE_VALID_IND,
TAX_ID_IND

Global Changes That Affect All Applications

Case: 33960 Specify more than 2 column level filters

Changed the column filter dialog to allow up to 10 different filters to be applied per column.

Case: 53223 Hover Text option for columns on regular reporting screens

Moved the "Hover Text" property from the Data Grid Entry Columns section of the page level administration tab to the regular Data Grid Columns section. This allows narrow columns to have the hover functionality on regular read-only reporting grids.

Case: 53759 Contact Status Summary report: Add contact type info

Email Type, Email Preferred, Phone Type, and Phone Number Seq columns have been added to the Contact Status Summary report. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Case: 53927 New Warehouse table(s): SYNVALIDATION_FIELDS

New warehouse table FASTPORTAL.SYNVALIDATION_FIELDS exists to house code and descriptions for validation values. Currently, email types and descriptions can be found in this table.

Case: 54102 Allow Last Name to be blank

Updated FAST to allow for blank last names.
