FASTAR

Case: 53289   Ability to export to PDF/Excel from Bad Debt Batch History screen

Replaced the old Bad Debt Batch History legacy screen with a new style report which supports all the standard features such as Filter Options, Advanced Options, Export to various formats, etc.

Client specific cases may or may not appear in this list, depending on their impact on the baseline applications and / or site specific settings.

FASTBUDGET

Case: 54455   Excel Import fails if more than 9999 rows in the import file

Fixed a bug where Excel Import would fail when there were more than 9999 rows in the file.

Case: 54489   Budget Transfer Balance should show budget - actuals for Revenue accounts

When showing new balance on the Budget Transfer Balance tab Revenue accounts should show Budget - actuals. It was showing Budget + actuals.

FASTFINAID

Case: 54184   Student Financial Aid Awards by Aid Year speed issues

Indexes have been added to the underlying FAST tables to increase the speed of this report.

Case: 54423   Student Financial Aid Awards by Period Report: Add Sport Info and Filter

Sport Code and Description columns and filter have been added. You can adjust whether new columns and/or filters are added/ enabled via the Administration tab of the report.

Case: 54549   Student Financial Aid Awards by Period Report: New Columns

Added the following columns to the Aid Awards by Period report:

LOCKED_NEEDS_ANALYSIS
TRACKING_GROUP_CODE
TRACKING_GROUP_DESC
BUDGET_GROUP_CODE
BUDGET_GROUP_DESC
PACKAGING_GROUP_CODE
PACKAGING_GROUP_DESC
AID_PERIOD
AID_PERIOD_DESC

Client specific cases may or may not appear in this list, depending on their impact on the baseline applications and / or site specific settings.

FASTFINANCE

Case: 54456   Data refresh issue when period 10 is closed at the same time as 11

Fixed a bug in the Finance data refresh when period 10 was closed at the same time as period 11 (or the same time as both period 11 and 12) where the system would then try to archive period data > "9" instead of > "09" which would require manual intervention from us to fix.

Case: 54869   Retain subtotal lines when using "Suppress $0 Lines"

When using the "Suppress $0 Lines" filter (but the "Suppress Subtotals" is not used) the Trial Balance report will now retain any subtotal lines which net to zero. The problem was if there were multiple detail lines which were non zero but the subtotal amount would net to zero, the subtotal would be hidden when it really shouldn't have been. The behavior will now be as expected for all four combinations of using the two "Suppress $0 Lines" and "Suppress Subtotals" filters. If your organization has an existing customization for the Trial Balance report, it will likely need to be updated to be compatible with this new change. If this new behavior is problematic a customization could be created to revert to the old behavior.

FASTHR

Case: 54276   Pull Emp Class from All Jobs on Pay Period Earnings Detail report

Changed the Emp "Class" column on the Pay Period Earnings Detail report to pull from All Jobs (historic point in time information) instead of PEBEMPL.

Client specific cases may or may not appear in this list, depending on their impact on the baseline applications and / or site specific settings.

FASTJV

Case: 54358   Setting to control default behavior of attach checkbox when reversing

Created a new configuration setting to control the default behavior of the "Attach PDF copy of original document" checkbox when reversing a document. The configuration setting is #400 and defaults to Y, so the checkbox will default to checked. If this setting is changed to N then the checkbox will be un-checked by default.

FASTPCARD

Case: 54555   Print Monthly Statement error when no data

When a user had menu access to Account Holders -> Print Monthly Statement, but they didn't get any data returned (because they had no cards, or weren't members of any departments, etc) they would get an error message. This has been fixed so they'll now get a screen with no results and empty dropdown lists.

Case: 54586   Add Account Number filter to Account Administration screen Filter Options tab

Added an Account Number filter to the Account Administration report.

FASTSTUDENT

Case: 54124   General Student Info: Race Information

Race information has been added to the General Student Info report and SYNSTUDENT_INFO report. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Case: 54278   Add Award Status Ind to Degrees Granted report

A new column, Award Status, has been added to the Convocation, Degrees Granted report. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Case: 54281   Waitlist Report: Add new columns

New columns are now available to be added to the report. To edit/review available columns, go to the Administration tab of the report, Data Grid Columns and click on 'Add New Data Grid Column' button in bottom left corner.

Case: 54402   New Event Attendance Info report

A new Event Attendance Info report has been added to the Student Info menu.

Case: 54415   Grading Approval Error

A silent error was preventing certain processed grades from getting removed from the approval queues. This issue has been resolved.

Case: 54422   Student Accounts, Student List Report: Add Sport Information and filter

Sport Code and Description columns and filter have been added. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Case: 54444   Student AR Institutional Definitions

Institutional Definition functionality is now available for use within Student AR reporting. Institutional Definitions can be used to re-categorize charges into custom categories. If you are interested in learning more about this functionality, please submit a customer support ticket to customersupport@mcsl.com.

Case: 54446   Add address information and filter to Student AR reports

Address information has been added to all baseline Student AR reports. An address type filter has also been added that can be used to choose the address type you would like returned within the report. Address Type groupings can be managed via Administration, Mail Groupings.

Case: 54453   Add Campus and Term Description to Admissions Checklist report

Added Campus Desc and Term Desc to 'Checklist' admissions report.

Case: 54454   Add 'Two Weeks Ahead' and 'This Two Weeks' filter function on Admissions report

Added two new Dynamic Filters called "Two Weeks ahead" and "This Two Weeks" to the Admissions report.

Case: 54566   Student AR Bill & Delinquency Code Baseline Dynamic Filter Procedures

Two new baseline filter procedures are available for use in custom reporting:
AR Billing Codes
AR Delinquency Codes

Case: 54607   Add Program Registration Blocks to General Student Info report

Program Block Code column has been added to the General Student Info report. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Case: 54614   Update completed credit hours to be evaluated on final grade

When evaluating what courses should be included in determining completed credit hours, FAST was looking at the initially assigned course grade rather than the final grade assigned, which takes into account grade changes. This issue has been resolved.

Case: 54778   Error Displaying Major 2 Description

Major 2 Description field within multiple FAST reports was erroneously displaying Major 1 Description. This issue has been resolved.

Case: 54818   Student to Finance FOAPAL Crosswalk change

The Chart of Accounts is now a mandatory field when entering data into the Student to Finance FOAPAL Crosswalk page.

Case: 54853   Update Academic History report to work with Dynamic Selections

Dynamic Selections can now be used on the Student ID filter on the Academic History report.

Case: 54867   Faculty Workload Term Summary report issue

When attempting to update the approve/verify columns or add comments while certain other columns were blank, an error was encountered. Report updated to allow updates without populating the course job or job contract type.

Case: 54875   FLAC Noninstructional Workload issue

For non-instructional workload records, the default Chart, Fund, Account, Program, Activity, and Location codes were erroneously showing as blanks in certain circumstances. This issue has been resolved.

Case: 54876   Faculty Workload Term Summary report filter issues

When Faculty College and/or Faculty Department filters were applied when Forecast filter populated, filter was not getting applied to forecast records. This issue has been resolved.

Global Changes That Affect All Applications

Case: 50074   Concatenate fails if too many values

When using the "Concatenate" group function on the Advanced Options tab, if the result is more than 4000 characters long it will now be truncated and end with "...(NUM)" where (NUM) is the number of remaining characters that were truncated.

Case: 53842   Add ability to see query on the Query Viewer page

When a user has access to the Query Builder screen, then a read only copy of the query will appear on the Query Viewer screen below the Query Results grid.

If a user does not have access to the Query Builder and they only have access to the Query Viewer, then there is no change in behavior and the user will not see the SQL statement that was used to generate the results.

Case: 53987   Table Builder - determining the Column Name

Fixed a bug when using an Excel import with the Create Table wizard to create a custom data entry table: the XL Column Name dropdown wasn't consistently automatically populating and would require the user to perform the mapping manually for each field.

Case: 54038   Show the user audit information for Form Generator

Added an info icon to the Form Generator list of templates to show the Created By, Created On, Updated By, Updated On fields for each template.

Case: 54272   Error updating Hyperlink with Condition of "All Values"

Fixed a bug that was preventing editing hyperlinks with the condition comparison set to "All Values."

Case: 54383   Form Editor- add can shrink/grow properties to richtext/textbox

Added "can shrink" and "can grow" properties to richtextbox and textbox controls.

Case: 54430   Form Editor - Enhancements

A number of form designer enhancements which include snap positioning, multi item select and move, copy + paste, color picker and much more!

Case: 54473   Field Search Report: Add Tooltip column

Tooltip information has been added. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Case: 54529   Timeout threshold for delayed send communication events

Timeout threshold for communication events was set to 60 minutes in one location, and 200 minutes in another location. Made these consistent at 200 minutes (but this can be changed on a site by site basis if necessary).

Case: 54554   Form Editor - New Grid options

Added two new grid properties:
1. Alternate color - true/false
2. Header - true/false

Case: 54589   Count and display on DATE column does not allow column filter

Fixed an issue when using Count (and Display) on the Advanced Options tab for a column that is a date type, the system wasn't allowing column filters on the resultant columns.

Case: 54740   Blackout Windows not showing on Global Events homepage tab

Blackout windows were not appearing on the Global Events tab of the Scheduler section of the homepage. They would appear on the Personal Pinned Reports tab and the Communication Centre tab, they just weren't showing on the Global Events tab. This has been fixed.

Client specific cases may or may not appear in this list, depending on their impact on the baseline applications and / or site specific settings.
