FASTFINANCE

Case: 56451   Add optional coding Title columns to Current Year Budget by Position report

Added Fund Title, Orgn Title, Prog Title, Acct Title, and Posn Title columns to the Current Year Budget by Position report. These columns are de-selected by default and can be enabled temporarily via the Advanced Options tab, or enabled permanently via the Administration tab.

Case: 56478   Financial Statement Editor: FundType being mistaken for AcctType

Fixed a bug when entering a Fund Type into a Financial Statement the system was using the value when building the statement as if it were an Acct Type.

Client specific cases may or may not appear in this list, depending on their impact on the baseline applications and / or site specific settings.

Global Changes That Affect All Applications

Case: 56165   "Created By" incorrect on Notifications

Removed the "Created By" label from Notification messages appearing under the bell icon on the site header bar, as it was actually displaying the current logged in user's name i.e. the name of the user who the notification was for, not the creator.

Case: 56230   Dynamic Filter Procedures won't save when using > or <

Fixed a bug where the Dynamic Filter Procedures screen would reject SQL queries that contained > or < symbols.

Case: 56401   Add pop-out button to Attachments dialog

Added a pop-out button to the title bar of the Attachments dialog ("Document List") so that it can be dragged off onto a separate monitor if desired. The button is two small overlapping squares in the top right of the dialog, immediately left of the X icon which closes the dialog.

Case: 56402   Download zip button for attachments

You can now download all attachments in a single click from the Document List attachments popup. The new Download All button at the bottom of this dialog will generate a single .zip file which includes all the files.

Case: 56460   Don't auto-execute the Report Execution Log

Changed the Report Execution Log report to not auto-execute on load so that users have a chance to specify filter options before executing.

Client specific cases may or may not appear in this list, depending on their impact on the baseline applications and / or site specific settings.
