# Release Notes: Version 5.0.02

## FASTFINANCE

### Case: 56370 Filter drill down supporting 150+ filter values

When drilling down between the various levels of the Operating Statement Summary reports, if a GL code filter had more than 150 values in it, the drilldown would fail. This has been fixed.

## FASTPCARD

### Case: 56508 Order of attaching receipts and supporting documents

In the "Document List" popup (attachment control) the default sort order of attachments will be Date descending. The Date or File Name column headers can be clicked on to toggle the sort between ascending and descending on either column.

### Case: 56688 Update Account Number filter to allow searching by Account Holder

Added an "Account Holder" input to the Account Number search filter. A partial or full User ID, First Name and/or Last Name can be entered into this search criteria.

### Case: 56766 Double warning when Source changes on Approval Status

Prevent double warning messages about attachments not being present when the Source dropdown changes on the Approval screen if configuration setting 797 is set to Y.

### Case: 57043 Changes to AP Review Report

Added the Status filter and column, and set the Gross Amount column to calculate a footer total.

## FASTRESEARCH

**Case: 57039 Intermittent problem posting invoice to AR when multi chart w/ different fiscal periods**

Fixed a validation bug when posting invoices to FAST AR when multiple Charts exist with different fiscal period setups.

## FASTSTUDENT

### Case: 56531 Add Student AR Custom Categories & Filters to Course Tuition & Fee Detail Report

The following new filters have been added to the Course Fee Detail Report:
1) Course Attributes
2) Student AR Custom Category
3) Course Meet Schedule Type

You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

### Case: 56706 Academic History Report: Add alternate email address column/filter

A new Alternate Email filter and column have been added to the Academic History report. If the filter is populated and the student has that type of email address, it will be populated in the new Alt Email column (which is set to 'deselected' mode by default). You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

### Case: 56721 Course Planning: Issue copying existing plans

In certain circumstances when attempting to copy from one course plan to another, the query ran for an unreasonable amount of time and the system did not copy the course plan as intended. This issue has been resolved.

### Case: 56726 Add Course Attributes and Description to Academic History, All Registration Records, and Multi Class List report

Added the following columns to the Academic History, All Registration Records, and Multi Class List report:

Course Attributes
Course Attributes Description

### Case: 56759 Student Account Detail Report: Dynamic filters

Date dynamic filter options (previous month, previous week, today, yesterday, etc.) are now available for the Invoice Statement Date filter on the Student Account Detail report (previously name Account Balance report).

### Case: 56784 Admissions Checklist report: New Columns

The following columns have been added in 'deselected' mode. Administrators can adjust whether new columns and/or filters are selected, deselected or disabled via the Administration tab of the report. Users can enable a deselected column on via the Advanced Options tab.

- ACADEMIC_YEAR_CODE & ACADEMIC_YEAR_DESC
- ADMITTED
- ATTRIBUTE_CODES & ATTRIBUTE_DESCS
- CHECKLIST_ITEM_CODE & CHECKLIST_ITEM_DESC
- CHECKLIST_ORIG_CODE
- COHORT_CODES & COHORT_DESCS
- COLLEGE_CODE_1 & COLLEGE_CODE_2
- COLLEGE_DESC_1 & COLLEGE_DESC_2
- CONFIDENTIAL_IND
- DECEASED_IND
- DECISION_CODE & DECISION_DESC
- DEPT_CODE & DEPT_CODE_2
- DEPT_DESC & DEPT_DESC_2
- GENDER_NONBINARY_CODE & GENDER_NONBINARY_DESC
- MAJOR_CODE_1
- RATE_CODE & RATE_DESC
- SESSION_CODE
- VETERAN_IND

### Case: 56805 Visa Type Report Management page

IMPORTANT: A new data entry page has been created to manage what visa information is displayed within the FAST Student application and also which visa information shows on reports where only the primary visa info is displayed.

If you want to display visa information within the FAST Student application, go to the Administration -> Institutional Definitions -> Student Visa Type Code Management page. Insert records for each visa type you want to display and assign a priority type as to the order in which you would like to see that visa type.

Note that these changes will not display until after the student refresh has successfully completed.

If you have any questions, submit a support ticket to customersupport@mcsl.com.

### Case: 56845 Student Holds report breaks on filter 'Include Inactive Holds?'

Fixed a bug with the 'Include Inactive Holds?' filter on the Student Holds report.

### Case: 56874 Student Account Details report issue

The Student Account Details report (previously referred to as Student Account Balance report) was pulling the max term Student College for the student rather than the student college for the AR record term. If a student changed their primary college after the student AR term, the college was displaying incorrectly. This issue has been resolved

### Case: 56908 New Admission Transfer Detail report

New report located in the Admissions menu combines transfer course information with Admissions Applicant info. One record per application/transfer course record.

### Case: 56927 Student Tuition Deposit Information report

New report to provide tuition deposit information for Student AR. Can be found under the Student Accounts menu.

**Case: 57035 Add Country of Citizenship Code and Description to Admissions report**

Added the following columns to the Admissions report:

- Country of Citizenship
- Country of Citizenship Desc

## FASTWEBREQ

**Case: 56327 Status report performance when Banner running in the cloud**

Sped up performance of the Status report by removing calls to live Banner and replacing them with data warehouse information instead.

## Global Changes That Affect All Applications

**Case: 55549 Form Generator - totals on grids**

Added a Footer property (true/false) to the Form Generator grid properties.

**Case: 56660 Form gen / single record view sticking when user wants a grid**

When single record / form view is the default view, and the user changes to grid view and applies a column level filter, the report was re-rendering in single record / form view instead of leaving the user on the grid view. This has been fixed.

**Case: 56676 Checkbox in Attachments popup to track whether receipt has been reviewed**

Added two new columns to the "Document List" popup (attachments control): Tags & Reviewed.

These can be enabled/disabled in each application via Configuration Settings:
1340 - Enable Tags feature for Imaging (DSU) control (Y/N)
1341 - Enable Reviewed feature for Imaging (DSU) control (Y/N)

Users with the "<application> - Document Reviewed Flag" role are able to see and click the Reviewed column when the configuration setting is enabled. The original intended purpose of this feature is for the PCard module to allow AP/approvers to record which receipts they have already reviewed, but it could certainly be used for similar processes in other modules as well.

**Case: 56729 Make the Communication Batch History report land on Filter Options**

Updated the Administration -> Communication -> Communication Batch History report so that when clicked from the menu the report won't auto-execute and instead the user will land on the Filter Options tab.

**Case: 56896 Count(Distinct) with only one column breaking**

Fixed a bug where using the Count advanced option would break if only that one column was enabled in the report output.

**Case: 56897 Number formatting disappears when applying hyperlink formatting**

Fixed a bug where number formatting would be lost when hyperlink formatting was applied.

**Case: 57046 Fix Pinned Report Summary Execution**

Fixed a bug where the Last Executed date/time on the Pinned Reports information report did not match the popup when you click the "# of Executions" column.
