FASTFINANCE

Case: 56977   Date/Time filters on FOAPAL History report

For clients who run Banner: on the Additional Reports -> FOAPAL History report, the Effective Date, Activity Date, Next Change Date and Termination Date filters and columns have time components but the filtering and column filtering wasn't correctly taking these into account. This is fixed so you can now specify the time component.

Case: 57343   Improve refresh step 2500 performance

Improved the performance of one step in the Finance data refresh.

Case: 57565   Ability to pick Acct Level in Filter Options on Balance Sheet

On the Balance Sheet - Current Year (Summary) and Balance Sheet - Five Year Trend (Summary) reports, a new filter called "Level" has been added to the Filter Options tab. This will be kept in sync with the level selection controls on the Report Results tab (up and down arrows in the top left corner) so it can be set from either location.

This new filter allows users to select the Acct level before the report executes for the first time, where as before they would have to execute the report once and then change the level after. This also allows the level to be set/overwritten through a Dashboard Filter.

FASTPCARD

Case: 57143   Always allow returning a statement to originator

When configuration setting 797 "Require attachments when submitting for approval?" is set to Y and a user attaches something, then submits for approval, and then the attachment is deleted, the statement becomes stuck in a state where it can't be submitted anymore.

We have fixed this by ensuring that the "Return to Originator" option is always available even if no attachments are present.

FASTRESEARCH

Case: 55038   Make Form 300 PDF elements fillable

The signature lines and date lines in the SIGNATURES section of the Form 300 PDF report are now fillable.

FASTSTUDENT

Case: 57045   Add student type and student type description to multiple student registration reports

Added Program and Student Type filters to Academic History, Multi Class List, and All Registration Records reports. Added the Student Type and Student Type Description columns as well.

Case: 57051   Add filter Prior College to the Admissions report

Added a Prior College fllter to the Admissions report.

Case: 57076   Add Program, Major 1/2, and Faculty(College) filters to Admissions Applications QnR report

Added Program 1, Program 2, Major 1, Major 2, and College filters to the Admissions Applications QnR report.

Case: 57091   Academic Standing Logic error

If a student had an academic standing override record for a term, that information was not getting displayed in the A. Std. (Academic Standing) column. FAST was instead displaying the academic standing assigned by Banner. This issue has been resolved.

Case: 57109   Add Atheletic Information to Degree Records report

Added columns - Sport Type Codes and Sport Type Descriptions to the Degree Records report.

Case: 57134   Account Detail report: Add more name fields

The following columns have been added to the Student Accounts, Account Detail report (deselected by default):
- First Name
- Preferred First Name
- Middle Name
- Last Name
- Legal Name

You can adjust whether new columns and/or filters are enabled/selected via the Administration tab on the report.

Case: 57160   Alternate Emails

1) Altered the logic used when the alternate email address filter is used to first check if an active email address exists with the selected email type where the preferred indicator is also checked and if not, select the active email address with selected type that was most recently updated. Note: This filter already exists on the Academic History report and also the Student Info - General Info report. Previous to this change, FAST just tried to pull the email with selected email type that had most recently been updated rather than first looking for one marked preferred.

2) Added an alternate email address column and filter to the Admissions and Degree Records reports.

Case: 57196   General Info report: Add GPA columns

Added GPA columns to the datasource of the General Info report. These columns have not been added to the report by default, but can be added as needed by going to the page level Administration tab.

Case: 57258   Course Tuition & Fee Detail: Add Student Dept Desc

Student Dept Desc column added in deselected mode. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Case: 57279   Admission Transfer Detail report: New filters and columns

Multiple new filters and address columns added to report. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Case: 57290   Error running Course Summary report using live data option

Fixed a bug where the Course Summary report would not run when using the Report Source = Live ERP Data filter. Note that in some instances, running this report against live data can take a long time to execute.

Case: 57325   Add Minor information to Student AR List report

Added Minor Code & Description columns to the datasource for the Student AR List report. These columns are not visible by default, but can be added to the report if needed.

You can adjust whether new columns and/or filters are enabled/selected via the Administration tab on the report.

Case: 57362   Improve data refresh logging and notification emails

Improved data refresh log to make it easier to follow & troubleshoot.

Case: 57492   Report Scheduler breaks on scheduling any Account Balance report

Fixed a bug where the Account Balance report wouldn't work with Report Scheduler.

FASTWEBREQ

Case: 57248   Attachments dialog can get lost

Fixed a bug where the Attachments dialog on the Requisition screen would remember it's location, so if it was dragged off to the side or the browser window was resized from a large maximized state to a smaller windowed state, the coordinates of the popup may be off to the side and require scrolling. The dialog will no longer remember it's location and will always pop up in the middle of the screen each time it's opened.

Global Changes That Affect All Applications

Case: 54993   Restructure of Training Video Page

Re-designed the layout and structure of the Training Video tabs.

Case: 55534   Form Generator - Editable text box

We're thrilled to announce that our Form Generator now empowers you to create even more dynamic and interactive PDF documents. Say hello to editable textboxes!

What's New?

- Export PDFs with Editable Textboxes: When you generate a PDF from your forms, the textboxes within the document can be editable/fillable. Users can type, modify, and update their information directly within the PDF.

- Seamless User Experience: Your users can now complete and revise their responses without leaving the PDF environment.

- Effortless Customization: Customize the appearance of textboxes, adjust font sizes, and choose from various styling options. Make your forms look professional and user-friendly.

- Cross-Platform Compatibility: These fillable PDFs work seamlessly across devices—desktops, tablets, and smartphones. No more compatibility issues!

How to Use It?

- Create Your Form: Design your form using our intuitive Form Generator.
- Export as PDF: When you're ready, export your form as a PDF.
- Test It Out: Open the PDF and try editing the textboxes. You'll be amazed at how smooth it is!

Why It Matters?

- Efficiency: Streamline data collection and processing.
- User Satisfaction: Provide a modern, user-friendly experience.
- Professionalism: Impress recipients with polished PDF forms.

Ready to take your forms to the next level? Try out the new editable textboxes today!

Case: 56134   Pinning an Administration report

Fixed an issue with administration reports that are shared between FAST modules (i.e. reports that are found under Administration -> Information or Administration -> Access) where creating a Pinned Report on one of these screens would save the Pinned Report as a "Site Administration" report instead of saving it into the application the user was running it under.

Case: 57066   Can't enter & without data being converted to &

Fixed a bug with data entry grids where & would get converted to & in the data behind the scenes when saving.

Case: 57195   Crosstabs: Ability to rename "Crosstab Total" column header to something meaningful

When using the Calculate Row Total checkbox with the Cross Tab advanced option, the resulting column header always said "Cross Tab Total." We've now added a textbox next to the Calculate Row Total checkbox where a more meaningful column title can be manually entered if desired.

Case: 57243   Data Refresh Status page breaks on load

Fixed a bug where the Data Refresh Status report would not load if the NEXT_DATE of a job was 01/01/4000 (i.e. when the job is disabled).

Client specific cases may or may not appear in this list, depending on their impact on the baseline applications and / or site specific settings.

Case: 57391   Using SUM() Advanced Option with a Virtual Column breaks

Fixed a bug where performing a SUM() advanced option on a virtual column would break.

(This was also patched to 5.0.00.15, 5.0.01.01 and 5.0.02.01.)

Case: 57517   Hyperlinks w/ "All Values" won't export to Excel

Fixed a bug preventing export to Excel on reports that have Hyerlinks set up using the "All Values" comparison option. This fix was patched to v5.0.02 as well.
