

Marc Marcusse

Marc studied notarial law and Dutch law at VU (Vrije Universiteit) Amsterdam. After graduating, Marc began his career as a junior civil-law notary at De Brauw Blackstone Westbroek and Van Doorne. He later became a lawyer, most recently at Cees Advocaten, where he managed and had responsibility for the energy practice group. During his career, Marc completed the following programmes: “Leergang Energierecht” (energy law course) in 2012, and “Energierecht op locatie” (energy law on site) in 2022.

Marc became a Partner at Straatman Koster advocaten on 1 January 2022.

Practice areas

Renewable energy

Area Development

Construction and real estate

Expertise:

Marc specialises in the development, financing and operation of sustainable energy projects, such as the generation of sustainable heat (including geothermal energy) and district heating networks, wind energy, and rooftop solar and solar farms.

Marc is a hands-on adviser and ‘contract maker’ for sustainable energy projects. A raft of sectoral regulations, many of which are outdated, apply to energy projects. Drawing on his creativity and adopting a broad perspective, Marc advises on the legal structuring of partnerships and alliances, cooperation contracts, development and building contracts as well as the realisation, financing and operation of projects and installations. Marc is noted for his awareness of the intricacies of this complex arena, without making matters unnecessarily complex.

His clients include in particular developers and builders of sustainable energy projects, developers and builders of real estate projects facing energy-related challenges and financial backers of sustainable energy projects.

Marc is a member of the supervisory board of Stichting Tent (www.tent.eu), the house for contemporary circus, and a member of the Dutch Energy Law Association (NeVer).

Marc has listed the following main and secondary legal practice areas in the register of legal practice areas of the Netherlands Bar (Nederlandse orde van advocaten, NOvA):

- Real estate law
- Economic planning law (energy law)

This listing requires him to obtain ten training credits in each registered main legal practice area in accordance with the standards of the Netherlands Bar each calendar year.
