

CONTAINER CONVERSIONS

Ever considered using a converted shipping container? Conversions is the fastest growing division of Willbox. The use of shipping containers is incredibly diverse. You'll be amazed what we can build from a container!

Willbox prides itself in taking ownership of projects from the initial idea to the completed handover of the project or product. This is what we do for you:

- Initial client survey
- Preliminary pricing
- Project proposal meetings
- Site Surveys
- CAD Design
- Technical specification
- Regulatory requirements
- 3D Illustrations

The use for containers is as limitless as your imagination. Original concepts included storage shed, site cabins or layby burger stands. Nowadays, our range of diverse customers are using containers for applications including:

- Modular office buildings
- Site welfare
- Classrooms
- Test facilities
- Plant equipment
- Defense projects
- Fitness & pop-up gyms
- Retail
- Power generation
- Renewable facilities
- Recycling facilities

Our Nursling HQ has seen significant investment over the last few years including:

- #2. State of the art conversion workshop facilities with paint & fabrication equipment
- 1.5 acres of additional container storage
- A 0.5 acre self-storage site
- Containerised office spaces
- Concreted loading points
- Expanded security & CCTV network

We look after all the transportation of your bespoke conversions. We have in-house rigid and articulated hiab crane vehicles to deliver our equipment.

Our drivers are highly trained and familiar with delivering to a variety of sites – from small residential streets to large construction sites.
